Ungoverned Spaces Alternatives To State Authority In An Era Of Softened Sovereignty:

Ungoverned Spaces Anne Clunan, Trinkunas A. Harold, 2010-05-10 Ungoverned spaces are often cited as key threats to national and international security and are increasingly targeted by the international community for external interventions both armed and otherwise This book examines exactly when and how these spaces contribute to global insecurity and it incorporates the many spaces where state authority is contested from tribal sectarian or clan based governance in such places as Pakistani Waziristan to areas ruled by persistent insurgencies such as Colombia to nonphysical spaces such as the internet and global finance Within this multiplicity of contexts the book addresses a range of security concerns including weapons of mass destruction migrants dirty money cyberdata terrorists drug lords warlords insurgents radical Islamist groups and human privacy and security Ultimately Ungoverned Spaces demonstrates that state centric approaches to these concerns are unlikely to supplant the many sites of authority that provide governance in a world of softened sovereignty

Criminal Insurgents in Mexico and Latin America John P. Sullivan, Robert J. Bunker, 2015-03-05 The 4th Small Wars Journal/El Centro anthology comes at a pivotal time roughly a third of the way through the term for the Enrique Peña Nieto administration in Mexico The mass kidnapping and execution of 43 rural student teachers in Iguala Guerrero in late September 2014 has only served to further highlight the corruptive effects of organized crime on the public institutions in that country In addition many other states in Latin America are now suffering at the hands of criminal insurgents who are threatening their citizens and challenging their sovereign rights Dave Dilegge SWJ Editor in Chief **Global Security**

Upheaval Robert Mandel, 2013-04-03 This book calls into question the commonly held contentions that central governments are the most important or even the sole sources of a nation's stability and that subnational and transnational nonstate forces are a major source of global instability By assessing recent real world trends Mandel reveals that areas exist where it makes little sense to rely on state governments for stability and that attempts to bolster such governments to promote stability often prove futile He demonstrates how armed nonstate groups can sometimes provide local stability better than states and how power sharing arrangements between states and armed nonstate groups may sometimes be viable He concludes that these trends in the international setting call for major shifts in our understanding of what constitutes stable governance proposing that we adopt a fluid emergent actor approach And he calls for significant deviation from standard policy responses to the opportunities and dangers posed by nontraditional sources of national authority Reducing Armed Violence with NGO

Governance Rodney Bruce Hall, 2013-10-01 NGOs have proliferated in number and become increasingly influential players in world politics in the past three decades From the 1970s with the access of social movements and private NGOs to local and international institutions NGOs have enjoyed an opening to bring impact global policy debates Yet NGOs find themselves highly constrained in bringing their material and epistemic resources to bear in the security arena where their activities normally must be authorized by states or international organizations acting with authority delegated from states They also

find their activities particularly in the security arena come frequently under attack as lacking accountability or lacking legitimacy as NGOs are self appointed private actors often representing only themselves they are seen by many as self appointed meddlers in transnational affairs This book provides a comprehensive and accessible analysis whether or the extent to which NGOs can contribute as private actors to authoritative governance outcomes in the security realm and thereby help mitigate armed violence by plugging governance gaps in this arena that state actors or international governmental organizations IGOs either neglect or can better address with NGO assistance This book examines the current and future issues surrounding this objective in four sections i a practitioner s perspective of the potentials of conflict governance NGOs ii global civil society and legitimation of conflict governance NGO activities iii conflict governance NGOs as norm entrepreneurs and norm diffusion in global governance iv conflict governance NGOs in action **Special**

Operations Forces in the 21st Century Jessica Glicken Turnley, Kobi Michael, Eyal Ben-Ari, 2017-08-09 This book sets out the major social scientific approaches to the study of Special Operations Forces Despite consistent downsizing over the past two decades the armed forces of the industrial democracies have seen a huge growth in Special Operations Forces SOF Through increasing numbers of personnel and more frequent deployments SOF units have wielded considerable influence in conflicts around the world with senior SOF officers having led major strategic operations This increased presence and unprecedented expansion for SOF is largely a result of the new kinds of conflicts that have emerged in the 21st century At the same time even with this high profile in the military policy and media and popular cultural arenas there is relatively little social scientific research on SOF This volume aims to fill this gap by providing a series of studies and analyses of SOF across the globe since the end of World War II Analysing SOF at the micro mezzo and macro levels provides broad and diverse insights Moreover the volume deals with new issues raised by the use of such forces that include emerging modes of civilian control innovative organizational forms and the special psychological characteristics necessitated by SOF operatives It concludes with a discussion of a question which continues to be debated in today s militaries what makes SOF special Filling a clear gap in the literature this book will be of much interest to students of strategic studies civil military relations irregular warfare security studies and international relations Pathways to African Food Security Michiel de Haas, Ken E.

Giller, 2025-01-31 This book examines Africa s current food system and future challenges for food security over the next 25 years Africa is on the rise and by 2050 the continent will be home to a quarter of the world s population The analysis presented in this book clearly shows that the African food system needs to transform at a much faster pace to ensure that the people it serves are food secure This book begins with four contrasting case studies that focus on country specific challenges in Egypt Ethiopia Senegal and Zimbabwe This is followed by 15 thematic chapters organised in three sections on challenges threats and opportunities Individual chapters address a wide range of topics including climate change water security farm sizes crop yields conservation trade offs food prices trade conflict and structural change The book concludes by discussing

key pathways to improve Africa's food system and food security for the decades ahead. This book is essential reading for students, scholars, and practitioners who work on global food security, sustainable food systems, food health, and nutrition and African development. International Human Rights Law Beyond State Territorial Control Antal Berkes, 2021-06-17. An analysis of international human rights law's applicability and effectiveness in geographic areas where the State has lost territorial control. **21st Century Cooperation** Antoni Esteve, Louis W. Goodman, 2017-05-18. This edited volume explains the importance of regional public goods (RPGs) for sustainable development and shows why they are particularly important in the context of 21st-century international relations. By presenting a new and original data set and by presenting original essays by renowned scholars, this book lays the foundation for what will become an increasingly important focus for both economic development and international relations as well as for their intersection. The volume contains four parts. The first introduces the core issues and concepts that are explored throughout the book as well as a new and original data set on RPGs. The second part further develops specific concepts important for understanding 21st-century RPGs: regional leadership, alliances, networks, and outcomes. The third examines how cooperation takes place worldwide for a range of important RPGs. Finally, the fourth part discusses how public goods are produced in specific regions, stressing that each region has a distinct context and that these contexts overlap in a decentered, multiplex manner. Global economic cooperation will be different in the 21st century, and this volume will be of interest to students and scholars of global governance, economic development, international political economy, sustainable development, and comparative regionalism.

Rule of Law and Areas of Limited Statehood Linda Hamid, Jan Wouters, 2021-01-29. This thought-provoking book addresses the legal questions raised by areas of limited statehood in which the State lacks the ability to exercise the full depth of its governmental authority. Featuring original contributions written by renowned international scholars, chapters investigate key issues arising at the junction between both domestic and international rule of law and areas of limited statehood as well as the alternative modes of governance that develop therein.

Comparing Police Organizations Jenny Fleming, Sebastian Roché, 2024-02-15. Police-citizen encounters do not occur in a vacuum. Police systems globally have similarities and/or differences which remain largely understudied and therefore underexplained. Comparative policing is a new frontier for policing research as it aims at integrating the institutional and/or macro-determinants of police strategy and provides important insights into the context in which such strategies emerge. This volume shows how lessons and insights emerge from a comparative approach to policing research in various regions of the world. It demonstrates the explanatory power of cross-national studies with a particular focus on politics, policies, and for what concerns the nature of police work and the legitimacy of policing. The book presents comparative studies from different geographical locations such as Latin and Central America, Africa, India, and Europe, and

offers insights on Police worker politics in India and Brazil Police non state security actors and political legitimacy in central America Trust in the police and the militarization of law enforcement in Latin America The origins of police legitimacy in Europe How organizational contexts matter by analyzing police adolescent encounters in France and Germany Legitimacy and cooperation with the police in two African states Cross state and cross society research is desirable to increase our understanding of variations of the macro context in which police forces operate what policing means for citizens and for police officers as professional workers This insightful volume is a key resource for scholars and researchers of policing criminology sociology and law This book was originally published as the inaugural volume of Comparative Policing Review Policing and Society
