Unholy Ghost Writers On Depression:

Unholy Ghost Nell Casey, 2001-03-06 *Unholy Ghost* is a unique collection of essays about depression that in the spirit of William Styron's *Darkness Visible* finds vivid expression for an elusive illness suffered by more than one in five Americans today. Unlike any other memoir of depression, however, *Unholy Ghost* includes many voices and depicts the most complete portrait of the illness. Lauren Slater eloquently describes her own perilous experience as a pregnant woman on antidepressant medication. Susanna Kaysen, writing for the first time about depression since *Girl Interrupted*, criticizes herself and others for making too much of the illness. Larry McMurtry recounts the despair that descended after his quadruple bypass surgery. Meri Danquah describes the challenges of racism and depression. Ann Beattie sees melancholy as a consequence of her writing life. And Donald Hall lovingly remembers the moody seesaw of his relationship with his wife Jane Kenyon. The collection also includes an illuminating series of companion pieces. Russell Banks's and Chase Twichell's essays represent husband-and-wife perspectives on depression. Rose Styron's contribution about her husband's struggle with melancholy is paired with an excerpt from William Styron's *Darkness Visible*, and the book's editor, Nell Casey, juxtaposes her own essay about seeing her sister through her depression with Maud Casey's account of this experience. These companion pieces portray the complicated bond, a constant grasp for mutual understanding, forged by depressives and their family members. With an introduction by Kay Redfield Jamison, *Unholy Ghost* allows the bewildering experience of depression to be adequately and beautifully rendered. The twenty-two stories that make up this book will offer solace and enlightenment to all readers.

Black Dogs and Blue Words Kimberly Emmons, 2010 Analyzes the rhetoric surrounding depression. Maintains that the techniques and language of depression marketing strategies, vague words such as worry, irritability, and loss of interest, target women and young girls and encourage self-diagnosis and self-medication. Further, depression narratives and other texts encode a series of gendered messages about health and illness. As depression and other forms of mental illness move from the medical professional sphere into that of the consumer public, the boundary at which distress becomes disease grows ever more encompassing, the need for remediation and treatment increasingly warranted. From publisher description.

Understanding and Treating Patients in Clinical Psychoanalysis Sandra Buechler, 2015-03-05 *Understanding and Treating Patients in Clinical Psychoanalysis: Lessons from Literature* describes the problematic ways people learn to cope with life's fundamental challenges, such as maintaining self-esteem, bearing loss, and growing old. People tend to deal with the challenges of being human in characteristic, repetitive ways. Descriptions of these patterns in diagnostic terms can be at best dry and at worst confusing, especially for those starting training in any of the clinical disciplines. To try to appeal to a wider audience, this book illustrates each coping pattern using vivid, compelling fiction whose characters express their dilemmas in easily accessible, evocative language. Sandra Buechler uses these examples to show some of the ways we complicate our lives and, through reimagining different scenarios for these characters, she illustrates how clients can achieve greater emotional

health and live their lives more productively Drawing on the work of Dostoevsky Tolstoy Munro Mann James O Connor Chopin McCullers Carver and the many other authors represented here Buechler shows how their keen observational short fiction portrays self hurtful styles of living She explores how human beings cope using schizoid paranoid grandiose hysteric obsessive and other defensive styles Each is costly in many senses and each limits the possibility for happiness and fulfillment Understanding and Treating Patients in Clinical Psychoanalysis offers insights into what living with and working with problematic behaviors really means through a series of examples of the major personality disorders as portrayed in literature Through these fictitious examples clinicians and trainees and undergraduate and graduate students can gain a greater understanding of how someone becomes paranoid schizoid narcissistic obsessive or depressive and how that affects them and those around them including the mental health professionals who work with them **Depression** Bradley

Lewis,2012-01-24 We live in an era of depression a condition that causes extensive suffering for individuals and families and saps our collective productivity Yet there remains considerable confusion about how to understand depression Depression Integrating Science Culture and Humanities looks at the varied and multiple models through which depression is understood Highlighting how depression is increasingly seen through models of biomedicine and through biomedical catch alls such as broken brains and chemical imbalances psychiatrist and cultural studies scholar Bradley Lewis shows how depression is also understood through a variety of other contemporary models Furthermore Lewis explores the different ways that depression has been categorized described and experienced across history and across cultures *From Madness to Mental Health* Greg Eghigian,2009-12-10 From Madness to Mental Health neither glorifies nor denigrates the contributions of psychiatry clinical psychology and psychotherapy but rather considers how mental disorders have historically challenged the ways in which human beings have understood and valued their bodies minds and souls Greg Eghigian has compiled a unique anthology of readings from ancient times to the present that includes Hippocrates Julian of Norwich s Revelations of Divine Love penned in the 1390s Dorothea Dix Aaron T Beck Carl Rogers and others culled from religious texts clinical case studies memoirs academic lectures hospital and government records legal and medical treatises and art collections Incorporating historical experiences of medical practitioners and those deemed mentally ill From Madness to Mental Health also includes an updated bibliography of first person narratives on mental illness compiled by Gail A Hornstein [The Human Psyche](#) Peter

Snow,2010 The Human Psyche is a far reaching expose of human identity that seeks to unify the startling new insights gained from modern neuroscientific studies of higher consciousness with insights gained from introspection and philosophy In simple straightforward prose and diagrammatic form it presents several new models of the generation of and interactions between the neural centers that are responsible for thought emotion and mood It will be of particular interest to neuroscientists neurologists biologists mental health professionals students of religion and philosophers and indeed all those fascinated by human behavior its origins in the animal world and its implications for our future The Human Psyche reminds

us that we live in a time when science finally has significant answers about the true nature and origins of human behavior a perspective that heralds a new era that will inevitably see the dissolution of many hallowed though plainly stagnant institutions and the establishment of a new world *Encyclopedia of Emotion* Gretchen M. Reevy,2010-09-07 This unique two volume reference is an accessible up to date resource for the rich and fascinating study of human emotion Drawing on both contemporary and classic research Encyclopedia of Emotion explores the complex realities of our emotional lives and communicates what psychologists have learned about them to date in a clear and captivating way The landmark work bridges the divide within psychology as a discipline between basic and applied science gathering together in one comprehensive resource both theoretical and clinical perspectives on this important subject In two volumes Encyclopedia of Emotion offers more than 400 alphabetically organized entries on a broad range of topics including the neurological foundations of emotional function competing theories of emotion multicultural perspectives on emotions emotional disorders their diagnosis and treatment and profiles of important organizations and key figures who have shaped our understanding of how and why we feel the way we do *Feelings of Being Alive* Joerg Fingerhut,Sabine Marienberg,2012-07-30 The question of what characterizes feelings of being alive is a puzzling and controversial one Are we dealing with a unique affective phenomenon or can it be integrated into existing classifications of emotions and moods What might be the natural basis for such feelings What could be considered their specifically human dimension These issues are addressed by researchers from various disciplines including philosophy of mind and emotions psychology and history of art This volume contains original papers on the topic of feelings of being alive by Fiorella Battaglia Eva Maria Engelen Joerg Fingerhut Thomas Fuchs Alice Holzhey Kunz Matthias Jung Tanja Klemm Riccardo Manzotti Sabine Marienberg Matthew Ratcliffe Arbogast Schmitt Jan Slaby and Achim Stephan *Unraveling* M. F. Alvarez,2023-10-09 Unraveling An Autoethnography of Suicide and Renewal is an autoethnographic story that explores the intricate relationship among trauma marginality and mental health It follows Mike Alvarez a precocious gay teenager from an immigrant Filipino family who loses his grip on reality as he succumbs to so called mental illness Divided into two parts the first half of the book uses evocative storytelling and in the moment narration to capture the slow descent into anxiety paranoia depression and suicidality as experienced by the author during young adulthood The second half of the book critically reflects upon the story through a series of analytic chapters In these chapters the author considers the role of narrative in cultivating empathy for the mentally ill the psychiatric industrial complex s obstruction of that empathy and the moral dilemmas autoethnographers face when writing about self other and the social world This book will be suitable for scholars in the social sciences communication studies and healthcare who study and use autoethnography in their research It will also be of value to those interested in firsthand accounts of madness as told by members of marginalized communities **Making a Difference in Patients' Lives** Sandra Buechler,2008-04-24 Winner of the 2009 Grady Award for Outstanding Psychoanalytic Publication Within the title of her book Making a Difference in

Patients Lives Sandra Buechler echoes the hope of all clinicians But she counters experience soon convinces most of us that insight on its own is often not powerful enough to have a significant impact on how a life is actually lived Many clinicians and therapists have turned toward emotional experience within and outside the treatment setting as a resource How can the immense power of lived emotional experience be harnessed in the service of helping patients live richer more satisfying lives Most patients come into treatment because they are too anxious or depressed or don t seem to feel alive enough Something is wrong with what they feel or don t feel Given that the emotions operate as a system with the intensity of each affecting the level of all the others it makes sense that it would be an emotional experience that would have enough power to change what we feel But ironically the wider culture and even psychoanalysts seem to favor solutions that aim to mute emotionality rather than relying on one emotion to modify another We turn to pharmaceutical cognitive or behavioral change to make a difference in how life feels Because we are afraid of emotional intensity we cut off our most powerful source of regulation In clear jargon free prose that utilizes both clinical vignettes and excerpts from poetry art and literature Buechler explores how the power to feel can become the power to change Through an active empathic engagement with the patient and an awareness of the healing potential inherent in each of our fundamental emotions the clinician can make a substantial difference in the patient s capacity to embrace life
