Writing Under Pressure Sanford Kaye, 1990-12-13 Most writing is done under pressure An executive has to produce a three page position paper by tomorrow at nine A department head suddenly has to write a one page action memo by noon A graduate student has a twenty page research paper due in a week Yet while most students and professionals write under pressure with limited time limited space and a supervisor or instructor to please few approach the task systematically In *Writing Under Pressure* Sanford Kaye a renowned expert on the subject presents a system he calls the Quick Writing Process QWP that focuses on real world writing tasks and demonstrates how to produce the clearest most honest most powerful work possible under the constraints of time and space A writing instructor with twenty five years experience teaching students and professionals in business and government Kaye tells writers how to budget their time and how to use this time efficiently Exploring particular writing situations in which QWP can be applied to make the most of what the writer knows Kaye discusses the process of taking exams focusing on how instructors select questions and evaluate essays He also considers writing in business and government featuring an insightful analysis of a memo written by Colonel Oliver North This memo highlights one of the most important issues writers in business and government face whether to write the truth as they see it or simply what their bosses want to hear Presenting a wealth of such examples Kaye reveals how to break through stifling organizational codes in order to write memos and position papers that count While most guides to writing ignore the constraints of time and space *Writing Under Pressure* tackles these problems head on making it an essential reference for students business professionals government officials or anyone else faced with a difficult writing assignment that has to be done now

knowledge and hard work do not guarantee success in a managerial or professional career. Competent, knowledgeable and hardworking people often have less impact and achieve less career success than they deserve. Sometimes the missing ingredient for success is a set of fundamental skills: skills that give talent, knowledge and hard work leverage and visibility. The body of knowledge to be mastered in a technical or professional education leaves little or no time for the acquisition of skills that cut across disciplinary boundaries. Used in all fields, these generic skills are vital to the careers of many managers and professionals. The manager and professional who can write efficiently and well, who is an effective and willing public speaker, who can interview effectively, who can and does relate effectively with others, who is personally able to use a computer, and who can tap into the burgeoning volume of information with some precision, has a greater probability of success than one who cannot or does not. The Management Skills Builder is intended to increase awareness of the need for these skills among intelligent and dedicated professionals and to suggest ideas about how these skills may be acquired, further developed and honed. Strategies for the development of each skill are provided along with a resource list that includes recommended books, videos and other learning aids.
