Writing On The Wall Scenario Development In Times Of Discontinuity:

Writing on the Wall Philip Van Notten, 2005 Although the significance of 9 11 is subject to debate it is symbolic of a general sentiment of discontinuity whereby society is vulnerable to undefined and highly disruptive events Recent catalysts of this sentiment are eye catching developments such as the SARS Severe Acute Respiratory Syndrome and bird flu outbreaks the Enron and Parmalat scandals political assassinations in Sweden and the Netherlands regime changes in Iraq and Afghanistan and terrorist attacks in Bali Istanbul Madrid and various parts of the Middle East However recent discontinuities should not be seen as evidence that discontinuities occur more frequently now than they did before Looking back in history we see that disruptive processes are common For example 25 years ago few Europeans would have predicted the upcoming upheavals on their own continent the collapse of communism Berlin as the capital of a reunited Germany the wars in the former Yugoslavia the single European currency and the near doubling of the number of European Union member states Changes elsewhere have been no less discontinuous and unforeseen the fall of the Asian tigers the emergence of the Internet and mobile telecommunication and the presidency of Nelson Mandela Societal discontinuity is a relatively new area of concern in policy development Since the 1970s the consideration of change and discontinuity has gained some ground over predictive forecasting which tended to reason from continuous developments and linear processes Rather than making forecasting the future it has become popular to use scenarios as a manner to consider several possible futures Scenarios are coherent descriptions of alternative hypothetical futures that reflect different perspectives on past present and future developments which can serve as a basis for action Scenario development aims to combine analytical knowledge with creative thinking in an effort to capture a wide range of possible future developments in a limited number of outlooks Scenario development assumes that the future is uncertain and the directions in which current developments might range from the conventional to the revolutionary In theory scenario development is a way to consider future discontinuity However there are indications that the theoretical promise is not reflected in scenario practice Research has shown that scenarios do not consider the idea of discontinuity as a matter of course In our research we found that a scenario study would benefit from efforts to create and foster a culture of curiosity for exploring the future and the possible discontinuities rather than simply commissioning a scenario study to provide insights about the future Only then can one read the writing on the wall of future developments

Schooling for Tomorrow Think Scenarios, Rethink Education OECD, 2006-04-24 Discusses how to develop scenarios to address the longer term challenges confronting education policy and practice

Foresight in Organizations Patrick van der Duin, 2016-01-13 Foresight for Organizations will acquaint the reader with various foresight methods and tools to show the reader how these methods are used what the pitfalls are and how the methods relate to each other This innovative volume offers the reader the ability to carry out a study of the future by him or herself and apply the results in a decision making strategy process The author addresses the following methods scenarios trend analysis the Delphi method

quantitative trend extrapolation technology assessment backcasting and roadmapping the most relevant and popular methods that also cover the range of approaches from predictive via normative to explorative Every chapter also contains references to additional literature about the methods being discussed This book is essential reading for researchers academics and students in the areas of Community Development Sociology of organizations Change management Social entrepreneurship Sustainable development and participative planning

Managing Water Under Uncertainty and Risk: United Nations World Water Development Report #4 (3 Vols.) UNESCO,2012-01-01 Released every three years since March 2003 the United Nations World Water Development Report WWDR a flagship UN Water report published by UNESCO has become the voice of the United Nations system in terms of the state use and management of the world's freshwater resources The report is primarily targeted at national decision makers and water resource managers but is also aimed at educating and informing a broader audience from governments to the private sector and civil society It underlines the important roles water plays in all social economic and environmental decisions highlighting policy implications across various sectors from local and municipal to regional and international levels Similarly to the first two editions this report includes a comprehensive and up to date assessment of several key challenge areas such as water for food energy and human health and governance challenges such as institutional reform knowledge and capacity building and financing each produced by individual UN agencies

Foresight in Action Marjolein van Asselt,Susan van 't Klooster,Philip van Notten,Livia A. Smits,2012-06-25 Assessing the future is vital in informing public policy decisions One of the most widespread approaches is the development of scenarios which are alternative hypothetical futures Research has indicated however that the reality of how professionals go about employing scenarios is often starkly at odds with the theory a finding that has important ramifications for how the resulting images of the future should be interpreted It also shows the need for rewriting and updating theory This book based on an intensive five year study of how experts actually go about assessing the future provides a groundbreaking examination of foresighting in action Obtained via ethnographic techniques the results lay bare for the first time the real processes by which scenarios are made It is also the first book to examine foresighting for public policy which is so often overlooked in favour of business practice From handling of discontinuity to historical determinism the analysis reveals and explains why foresight is difficult and what the major pitfalls are Each chapter ends with a toolkit of recommendations for practice The book aims to help readers to reflect on their own practices of public oriented foresight and thus to foster a deeper understanding of the key principles and challenges Ultimately this will lead to better informed decision making

Routledge Handbook of Social Futures Carlos López Galviz,Emily Spiers,2021-11-22 Featuring chapters from an international range of leading and emerging scholars this Handbook provides a collection of cutting edge interdisciplinary research that sheds new light on contemporary futures studies Engaging with key defining questions of the early twenty first century such as climate change big data AI the future of economics education mental health cities and more

the Handbook provides a review and synthesis of futures scholarship highlighting the role that societies can and should play in their making While the various chapters demonstrate how futures emerge and take shape in particular places at particular times the distinctive insight provided by the volume overall is that futures thinking today must be social and contextual By presenting a range of futures work from contexts around the globe the Handbook contextualizes techniques forecasting backcasting scenario planning collaboration and co production to ask how different dimensions of the social are created and circulated in the process Through its thirty chapters the volume explores and interrogates narratives anticipations enactments ecologies collaborations prospectations and so on to highlight which versions of the social are legitimized and which are encouraged and foreclosed This Handbook opens an important conversation about the centrality of the social in futures thinking By bringing arts humanities and social sciences scholars and practitioners into conversation with biologists environmental climate and computer scientists this volume seeks to encourage new pathways across between and within multiple disciplines to interrogate the futures we need and want The social must be our starting point if we are to steer our planet in a direction that supports good lives for the many everywhere

Landscape Planning with Ecosystem Services

Christina von Haaren, Andrew A. Lovett, Christian Albert, 2019-06-25 Human well being depends in many ways on maintaining the stock of natural resources which deliver the services from which human s benefit However these resources and flows of services are increasingly threatened by unsustainable and competing land uses Particular threats exist to those public goods whose values are not well represented in markets or whose deterioration will only affect future generations As market forces alone are not sufficient effective means for local and regional planning are needed in order to safeguard scarce natural resources coordinate land uses and create sustainable landscape structures This book argues that a solution to such challenges in Europe can be found by merging the landscape planning tradition with ecosystem services concepts Landscape planning has strengths in recognition of public benefits and implementation mechanisms while the ecosystem services approach makes the connection between the status of natural assets and human well being more explicit It can also provide an economic perspective focused on individual preferences and benefits which helps validate the acceptability of environmental planning goals Thus linking landscape planning and ecosystem services provides a two way benefit creating a usable science to meet the needs of local and regional decision making The book is structured around the Driving forces Pressures States Impacts Responses framework providing an introduction to relevant concepts methodologies and techniques It presents a new ecosystem services informed approach to landscape planning that constitutes both a framework and toolbox for students and practitioners to address the environmental and landscape challenges of 21st century Europe

International Journal of Risk Assessment and Management ,2005 *Managing Water Under Uncertainty and Risk*

Unesco,2012 This flagship report is a comprehensive review that gives an overall picture of the world s freshwater resources It analyses pressures from decisions that drive demand for water and affect its availability It offers tools and response

options to help leaders in government the private sector and civil society address current and future challenges It suggests ways in which institutions can be reformed and their behaviour modified and explores possible sources of financing for the urgently needed investment in water The WWDR4 is a milestone within the WWDR series reporting directly on regions and highlighting hotspots and it has been mainstreamed for gender equality It introduces a thematic approach Managing Water under Uncertainty and Risk in the context of a world which is changing faster than ever in often unforeseeable ways with increasing uncertainties and risks It highlights that historical experience will no longer be sufficient to approximate the relationship between the quantities of available water and shifting future demands Like the earlier editions the WWDR4 also contains country level case studies describing the progress made in meeting water related objectives The WWDR4 also seeks to show that water has a central role in all aspects of economic development and social welfare and that concerted action via a collective approach of the water using sectors is needed to ensure water s many benefits are maximized and shared equitably and that water related development goals are achieved

Strategic Issues Facing Transportation Booz Allen Hamilton,2014 TRB s National Cooperative Highway Research Program Report 750 Strategic Issues Facing Transportation Volume 4 Sustainability as an Organizing Principle for Transportation Agencies includes an analytical framework and implementation approaches designed to assist state departments of transportation and other transportation agencies evaluate their current and future capacity to support a sustainable society by delivering transportation solutions in a rapidly changing social economic and environmental context in the next 30 to 50 years Publisher s description
