Environmental Protection Agency,1997-10 Scanning Probe Microscopy in Nanoscience and Nanotechnology 2 Bharat Bhushan,2010-12-17 This book presents the physical and technical foundation of the state of the art in applied scanning probe techniques It constitutes a timely and comprehensive overview of SPM applications The chapters in this volume relate to scanning probe microscopy techniques characterization of various materials and structures and typical industrial applications including topographic and dynamical surface studies of thin film semiconductors polymers paper ceramics and magnetic and biological materials The chapters are written by leading researchers and application scientists from all over the world and from various industries to provide a broader perspective

Correct Hardware Design and Verification Methods Tiziana Margaria,Tom F. Melham,2001-08-27 This book constitutes the refereed proceedings of the 11th IFIP WG 10 5 Advanced Research Working Conference on Correct Hardware Design and Verification Methods CHARME 2001 held in Livingston Scotland UK in September 2001 The 28 revised full papers and eight short papers presented together with two invited papers and one special paper were carefully reviewed and selected from 56 submissions The book offers topical sections on model checking clocking issues theorem proving with higher order logics hardware compilation tools component verification case studies algorithm verification and duration calculus

Calculation of High Angle of Attack Aerodynamics of Fighter Configurations Chuan-Tau Edward Lan,H. Emdad,Suei Chin,P. Sundaram,S. C. Mehrotra,R. K. Tripathi,1991 A computational method for lateral directional aerodynamics of fighter configurations is developed The leading edge vortices are represented by free vortex filaments which are adjusted iteratively to satisfy the force free condition The forebody vortex separation both symmetrical and asymmetrical is calculated using slender body theory Effect of boundary layer separation on lifting surfaces is accounted for using the effective sectional angels of attack The latter are obtained iteratively by matching the nonlinear sectional lift with the computed resulted based on lifting surface theory Results for several fighter configurations are employed for comparison with available data It is shown that the present method produces reasonable results in predicting sideslip derivatives while roll and yaw rate derivatives do not compare very well with forced oscillation test data at high angles of attack Industrial usage of this has produced mixed results At this time the use of these methods in a production manner is not recommended

Texas State Publications Texas State Publications Depository Program,1998 *Popular Science* ,1948-09 Popular

Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better
