Competitive Intelligence Christopher Murphy,2016-05-23 Every business manager needs intelligence to find suppliers mobilize capital win customers and fend off rivals Obtaining this is often an unplanned instinctive process The manager who has a conscious systematic approach to acquiring intelligence will be better placed to recognize and seize opportunities whilst safeguarding the organization against the competitive risks that endanger its prosperity and sometimes even its survival Christopher Murphy s *Competitive Intelligence* explains the theory of business competition how companies try to get ahead of their rivals methods of research and sources of information that generate the raw material for creating intelligence analytical techniques which transform the mass of facts and opinions thus retrieved into a platform of sound useable knowledge to support informed business decision making The text includes plenty of examples and experiences from the author s own consulting experience He draws on a wide variety of disciplines including literary criticism or how to read between the lines of company reports announcements and media stories and anthropology understanding corporate culture as well as the more obvious ones such as financial analysis management theory and business forecasting techniques This fusion of insights from many fields of expertise provides a very readable practical and imaginative framework for anyone seeking to gather and make effective use of market and company data While focused on the British business environment the lessons drawn are of universal application and examples are taken from across the globe In addition a chapter is devoted to researching industries and companies in other countries Although primarily concerned with commercial enterprises many of the principles and techniques will also be of considerable practical relevance to managers in the public sector or not for profit organizations *Competitive Intelligence* also provides a legal

Empirical Model Discovery and Theory Evaluation David F. Hendry,Jurgen A. Doornik,2014-07-03 A synthesis of the authors groundbreaking econometric research on

automatic model selection which uses powerful computational algorithms and theory evaluation Economic models of empirical phenomena are developed for a variety of reasons the most obvious of which is the numerical characterization of available evidence in a suitably parsimonious form Another is to test a theory or evaluate it against the evidence still another is to forecast future outcomes Building such models involves a multitude of decisions and the large number of features that need to be taken into account can overwhelm the researcher Automatic model selection which draws on recent advances in computation and search algorithms can create and then empirically investigate a vastly wider range of possibilities than even the greatest expert In this book leading econometricians David Hendry and Jurgen Doornik report on their several decades of innovative research on automatic model selection After introducing the principles of empirical model discovery and the role of model selection Hendry and Doornik outline the stages of developing a viable model of a complicated evolving process They discuss the discovery stages in detail considering both the theory of model selection and the performance of several algorithms They describe extensions to tackling outliers and multiple breaks leading to the general case of more candidate variables than observations Finally they briefly consider selecting models specifically for forecasting
