The Oxford Handbook of Nonsuicidal Self-Injury Elizabeth Lloyd-Richardson, Imke Baetens, Janis L. Whitlock, 2024 The Oxford Handbook of Nonsuicidal Self Injury is a compendium of up to date research and knowledge of topics germane to the field of nonsuicidal self injury (NSSI). Edited by renowned scholars Elizabeth E. Lloyd-Richardson, Imke Baetens, and Janis L. Whitlock, the handbook brings together cutting edge research from a group of internationally distinguished scholars. Advancing Theory of Suicide and Non-Suicidal Self-Injury Kathryn Jane Gardner, Edward A. Selby, E. David Klonsky, 2022-01-12 *Cutting and Self-Harm* Chris Simpson Ph.D., 2015-09-29 What is self harm and what causes it? Learn the terms and concepts related to this type of behavior. Non-suicidal self injury has been in existence to some extent for centuries. Today, the practices are increasing in terms of the number of people engaging in this often baffling behavior. By the use of accessible language, rich descriptions of concepts, and realistic case examples, *Cutting and Self-Harm* seeks to demystify these behaviors that afflict self-injuring individuals and negatively impact their family members and friends. Author Chris Simpson, PhD, has written and presented on the subject of self-harm since 2001. He begins the book by answering the question: What is cutting and self-harm, and how does it occur, and by explaining important terms and concepts related to the behavior. He then covers current controversies about self-harming behaviors and addresses frequently confusing topics such as the contributing factors to self injury, psychopharmacological treatment of the behavior, and the use of group therapeutic approaches in treatment facilities. The final section of the book presents additional resources for those impacted by self injury.

Prevention Targeting Mental Health and Nonsuicidal Self-injury in Adolescents Erik Aspegqvist, 2025-05-07 Adolescent mental health is today a topic raising great concern and reports of rising rates of mental health problems have led some to call the situation a mental health crisis In parallel with this there has been a realization that nonsuicidal self injury NSSI is something affecting an increasingly large share of adolescents The fact that resources are limited together with the knowledge of the burden of mental health problems have spurred a great interest in prevention Schools are seen as arenas with great potential for deploying preventive interventions targeting adolescents The available evidence for such interventions is however limited and there is a need to better understand how they could be more effective The present thesis aims to contribute to the scientific knowledge about school based mental health prevention by investigating the effects of a whole school prevention program to explore adolescents experiences of taking part in such a program and to shed light on heterogeneity among adolescents with a history of NSSI as well as mechanisms underlying engagement in NSSI In Study I the aim was to investigate emotion regulation and trauma symptoms as potential mediators of the association between childhood abuse and NSSI In a sample N 3 169 of data from community adolescents mediation was investigated using structural equation modeling Both emotion regulation and trauma symptoms were found to partly mediate the relationship between childhood abuse and NSSI and together to mediate this association completely Study conclusions

were that emotion regulation and trauma symptoms seem to be what drives NSSI rather than experiences of childhood abuse themselves Study II aimed to investigate characteristics of the subgroups of adolescents acknowledging NSSI when answering a dichotomous yes no question versus a checklist with NSSI behaviors in a sample N 266 of community adolescents These groups were found to be large and to differ from each other in several respects with implications both in clinical and research settings Further cluster analysis was employed in order to identify subgroups among adolescents with NSSI and finding such subgroups to be different from each other it was concluded that there was a need for greater awareness of the heterogeneity within NSSI In Study III the effects of a whole school preventive intervention were evaluated in longitudinal data from the same sample as in Study II N 183 with complete data from three points of measurement harnessing the cluster randomized controlled design of the overall project Effects were found on NSSI frequency which decreased at post intervention and on Stigma Awareness which increased Conclusions of Study III was that a whole school preventive intervention can be effective in reducing NSSI frequency and in increasing adolescents awareness of mental health stigma Study IV was a qualitative group interview study employing thematic analysis in order to explore adolescents experiences of taking part in the whole school preventive intervention as well as their perspectives on mental health Key findings were the identification of a autonomy help seeking dilemma and the perceived need of interventions targeting mental health among adolescents In conclusion the present thesis adds to the knowledge about prevention targeting NSSI and mental health among adolescents by documenting effects of a whole school prevention program Further the thesis provides insights related to school based prevention including adolescents experiences information on NSSI measurement and subgroups among individuals with a history of NSSI Ungdomars psykiska h lsa r idag ett mne som v cker stor oro och rapporter om stigande f rekombst av psykiska problem har f tt somliga att kalla situationen f r en psykisk h lsokris Parallellt med detta har det vuxit fram en insikt om att icke suicidalt sj lvskadebeteende eng nonsuicidal self injury NSSI r n got som drabbar en allt st rre andel ungdomar De begr nsade resurserna tillsammans med kunskapen om b rdan av psykiska problem har lett till ett stort intresse f r f rebyggande tg rder Skolor ses som arenor med stor potential f r f rebyggande insatser riktade till ungdomar Evidensen f r s dana insatser r dock begr nsad och det finns ett behov av att b ttre f rst hur de kan bli mer effektiva Denna avhandling syftar till att bidra till den vetenskapliga kunskapen om skolbaserad psykisk h lsoprevention genom att unders ka effekterna av ett skol vergripande preventionsprogram eng whole school prevention program utforska ungdomars erfarenheter av att delta i ett s dant program och att belysa heterogenitet bland ungdomar med en historia av sj lvskadebeteende samt mekanismer bakom sj lvskadebeteende I Studie I var syftet att unders ka emotionsreglering och traumasymptom som potentiella mediatorer av sambandet mellan vergrepp i barndomen och sj lvskadebeteende I ett urval N 3169 av data fr n ungdomar unders ktes mediation med hj lp av strukturell ekvationsmodellering B de emotionsreglering och traumasymptom visade sig delvis mediera sambandet mellan barndomsmisshandel och sj lvskadebeteende och tillsammans
