

Understanding Research in Clinical and Counseling Psychology

SECOND EDITION

EDITED BY

Jay C. Thomas and Michel Hersen

Understanding Research In Clinical And Counseling Psychology

Chris Barker, Nancy Pistrang, Robert Elliott

Understanding Research In Clinical And Counseling Psychology:

Understanding Research in Clinical and Counseling Psychology Jay C. Thomas, Michel Hersen, 2011-03-01 *Understanding Research in Clinical and Counseling Psychology* Second Edition is written and designed for graduate students in the psychology and counseling fields for whom the value of psychological research is not always readily apparent. Contributed to by experts in their respective fields, this text presents research as an indispensable tool for practice, a tool that is used every day to advance knowledge and improve assessment, treatment choice, and client outcomes. The book is divided into four logical parts: Research Foundations, Research Strategies, Research Practice, and finally, Special Problems. Included is a chapter that addresses one of the most important controversies: the distinction between realistic and gold standard efficacy studies. The remainder of the book addresses salient issues such as conducting research in various cultures, operating an empirically oriented practice, and performing research with families, children, and the elderly. Students and professors will find the coverage ample and penetrating without being too overwhelming.

Studyguide for Understanding Research in Clinical and Counseling Psychology By Cram101 Textbook Reviews, 2013-05. Never HIGHLIGHT a Book Again! Includes all testable terms, concepts, persons, places, and events. Cram101 Just the FACTS101 studyguides gives all of the outlines, highlights, and quizzes for your textbook with optional online comprehensive practice tests. Only Cram101 is Textbook Specific. Accompanies 9780872893795. This item is printed on demand. [Handbook of Clinical Psychology, Volume 1](#) Michel Hersen, Alan M. Gross, 2008-01-09. Handbook of Clinical Psychology Volume 1: Adults provides comprehensive coverage of the fundamentals of clinical psychological practice for adults from assessment through treatment, including the innovations of the past decade in ethics, cross-cultural psychology, psychoneuroimmunology, cognitive-behavioral treatment, psychopharmacology, and geropsychology.

Research Methods in Clinical Psychology Chris Barker, Nancy Pistrang, Robert Elliott, 2015-09-25. Fully updated to reflect the latest developments, the third edition of *Research Methods in Clinical Psychology* offers a comprehensive introduction to the various methods, approaches, and strategies for conducting research in the clinical psychology field. Represents the most accessible, user-friendly introduction to conducting and evaluating research for clinical psychologists and related professionals. Ideal for students and practitioners who wish to conduct their own research or gain a better understanding of published research. Addresses important issues such as philosophical underpinnings of various methodologies along with socio-political issues that arise in clinical and community settings. Step-by-step guidance through all phases of a clinical psychology research project from initial concept and groundwork through to measurement, design, analysis, and interpretation. Updates to this edition include new or expanded coverage of such topics as systematic review and literature searching methods, modern psychometric methods, guidance on choosing between different qualitative approaches, and conducting psychological research via the Internet.

The Oxford Handbook of Research Strategies for Clinical Psychology Jonathan S. Comer, Philip C. Kendall, 2013-05-09. The Oxford Handbook of Research Strategies for Clinical

Psychology has recruited some of the field's foremost experts to explicate the essential research strategies currently used across the modern clinical psychology landscape that maximize both scientific rigor and clinical relevance The SAGE Encyclopedia of Abnormal and Clinical Psychology Amy Wenzel, 2017-03-16 Abnormal and clinical psychology courses are offered in psychology programs at universities worldwide but the most recent major encyclopedia on the topic was published many years ago. Although general psychology handbooks and encyclopedias include essays on abnormal and clinical psychology, such works do not provide students with an accessible reference for understanding the full scope of the field. The SAGE Encyclopedia of Abnormal and Clinical Psychology, a 7-volume A-Z work in print and electronic formats, is such an authoritative work. Its more than 1,400 entries provide information on fundamental approaches and theories, various mental health disorders, assessment tools, and psychotherapeutic interventions, and the social, legal, and cultural frameworks that have contributed to debates in abnormal and clinical psychology. Key features include 1,400 signed articles contained in 7 volumes and available in choice of print and/or electronic formats. Although organized A to Z, the front matter includes a Reader's Guide grouping related entries thematically. Back matter includes a Chronology, Resource Guide, Bibliography, and detailed Index. Entries conclude with References, Further Readings, and Cross References to related entries. The Index, Reader's Guide, themes, and Cross References between and among entries all combine to provide robust search and browse features in the electronic version.

Encyclopedia of Behavior Modification and Cognitive Behavior Therapy Michel

Hersen, 2005-01-25 The three-volume Encyclopedia of Behavior Modification and Cognitive Behavior Therapy provides a thorough examination of the components of behavior modification, behavior therapy, cognitive behavior therapy, and applied behavior analysis for both child and adult populations in a variety of settings. Although the focus is on technical applications, entries also provide the historical context in which behavior therapists have worked, including research issues and strategies. Entries on assessment, ethical concerns, theoretical differences, and the unique contributions of key figures in the movement, including B.F. Skinner, Joseph Wolpe, Aaron T. Beck, and many others, are also included. No other reference source provides such comprehensive treatment of behavior modification, history, biography, theory, and application. Thematic Coverage: The first of the thematic volumes covers Adult Clinical Applications. Adults are the most common population encountered by researchers, clinicians, and students, and therefore more than 150 entries were needed to cover all necessary methods. The second volume covers Child Clinical Applications in 140 entries. One especially useful aspect of this volume will be the complications sections addressing what can go wrong in working with children. This is an area often overlooked in journal articles on the subject. Volume III, Educational Applications, addresses a range of strategies and principles of applied behavior analysis, positive behavior support, and behavior modification and therapy. These entries focus on classroom and school contexts in which the instructional and behavioral interactions between teachers and their learners are emphasized. Unique Easy-to-Follow Format: Each of the volumes' entries address a full range of mental health conditions and their respective

treatments with the aim of providing systematic and scientific evaluation of clinical interventions in a fashion which will lend itself to the particular style of treatment common to behavior modification. Major entries for specific strategies follow a similar format: 1 Description of the Strategy, 2 Research Basis, 3 Relevant Target Populations and Exceptions, 4 Complications, 5 Case Illustration, 6 Suggested Readings, 7 Key Words. Biographical sketches include the following: 1 Birthplace and Date, 2 Early Influences, 3 Education History, 4 Professional Models, 5 Major Contributions to the Field, 6 Current Work and Views, 7 Future Plans. Readership: This encyclopedia was designed to enhance the resources available to students, scholars, practitioners, and other interested social science readers. The use of in-text citations, jargon, and descriptions of research designs and statistics has been minimized, making this an accessible, comprehensive resource for students and scholars alike. Academic and research librarians in the social sciences, health, and medicine will all find this an invaluable addition to their collections. Key Features: Three thematic volumes and over 430 total entries. Five anchor articles in each volume provide context on major issues within the field. Key words and lists of suggested readings follow each entry. Contributions by internationally renowned authors from England, Germany, Canada, Australia, New Zealand, and the United States. Volume Editors: Volume I: Adult Clinical Applications, Michel Hersen, Johan Rosqvist, Pacific University; Volume II: Child Clinical Applications, Alan M. Gross, Ronald S. Drabman, University of Mississippi; Volume III: Educational Applications, George Sugai, Robert Horner, University of Oregon. Advisory Board: Thomas M. Achenbach, Ph.D., Department of Psychiatry, University of Vermont; Stewart W. Agras, M.D., Department of Psychiatry, Behavioral Science, Stanford University School of Medicine; David H. Barlow, Ph.D., ABPP, Center of Anxiety and Related Disorders, Boston University; Alan S. Bellack, Ph.D., ABPP, Department of Psychiatry, University of Maryland School of Medicine; Edward B. Blanchard, Ph.D., Department of Psychology, University of Albany, SUNY; James E. Carr, Ph.D., Department of Psychology, Western Michigan University; Anthony J. Cuvo, Ph.D., Rehabilitation Institute, Southern Illinois University; Gerald C. Davison, Ph.D., Department of Psychology, University of Southern California; Eric F. Dubow, Ph.D., Psychology Department, Bowling Green State University; Rex L. Forehand, Ph.D., Psychology Department, University of Vermont; Arnold A. Lazarus, Ph.D., ABPP, Center for Multimodal Psychological Services, Robert P. Liberman, M.D., Department of Psychiatry, West Louisiana VA Medical Center; Scott O. Lilienfeld, Ph.D., Department of Psychology, Emory University; Marsha M. Linehan, Ph.D., ABPP, Department of Psychology, University of Washington; Nathaniel McConaghy, D.Sc., M.D., School of Psychiatry, University of N.S.W., Australia; Rosemary O. Nelson Gray, Ph.D., Department of Psychology, University of North Carolina, Greensboro; Lars G. Ranst, Ph.D., Department of Psychology, Stockholms Universitet, Sweden; Alan D. Poling, Ph.D., Department of Psychology, Western Michigan University; Wendy K. Silverman, Ph.D., Department of Psychology, Florida International University; Gail Steketee, Ph.D., School of Social Work, Boston University; Douglas W. Woods, Ph.D., Department of Psychology, University of Wisconsin, Milwaukee.
