Joel Achenbach

Understanding The Present Science And The Soul Of Modern Man:

Understanding the Present Bryan Appleyard,1994-02-01 In a brilliant and explosively controversial work the author attacks modern science for destroying our spiritual sense of self What is the role of science in present day society Should we be as dazzled as we are by the innovations the insights and the miraculous improvements in material life that science has wrought Or is there a darker more pernicious side to our scientific success Renowned British science columnist Bryan Appleyard thoroughly explores each of these provocative topics in a book that has incited the ire of the scientific community He points out that while scientists have shaped our lives and our beliefs they have consistently failed to explain human consciousness the soul or the meaning of life From Galileo to Darwin from Copernicus to Oppenheimer countless scientists have proclaimed a universe in which human beings are only an accidental presence The unwitting result is that science has cast humankind adrift paralyzing us with fear and cutting us off from personal or religious truth In Appleyard s view science has done us appalling spiritual damage These startling conclusions have prompted strong counterattacks from the scientific establishment Yet regardless of where one falls in the debate *Understanding the Present* forces readers to re examine society s blind faith in the benevolence of modern science An exposition that is dazzling for its concrete illustrations and examples The New York Times A withering indictment of modern science This should crack a few test tubes Kirkus Reviews

Understanding the Present Bryan Appleyard,1992 Aims to make the wider issues and principal ideas of our age understandable to all The book refers to all spheres culture philosophy and politics and is split into five sections facts analysis connections perceptions and thesis

From Monk to Modernity, Second Edition Dominic Kirkham,2019-01-08 After spending many years in a religious order Dominic Kirkham describes how he was driven to meet the challenge of modern thinking an exercise that has proved both freeing and frightening He says this has been something of a personal odyssey which now spans a lifetime of over six decades and is still ongoing He adds that the presumption of the book is that this is of more than personal interest because the subject matter affects everyone my personal journey will no doubt reflect that of many others In a broad sweep from Neolithic times to the twenty first century he considers our human quest for meaning and a good life and how we can engage in it today

Unlocking Divine Action Michael J. Dodds,2012-09-26 A penetrating study of how the discoveries of contemporary science resonate with the thought of Thomas Aquinas to open a deeper understanding of God s action in the world publisher website

Why Us? James Le Fanu,2010-04-06 In this daring treatise on the current state of scientific inquiry James Le Fanu challenges the common assumption that further progress in genetic research and neuroscience must ultimately explain all there is to know about life and man s place in the world On the contrary he argues the most recent scientific findings point to an unbridgeable explanatory gap between the genes strung out along the Double Helix and the beauty and diversity of the living world and between the electrical activity of the brain and the abundant creativity of the human mind His exploration of these mysteries and his analysis of where they might lead

us in our thinking about the nature and purpose of human existence form the impassioned and riveting heart of *Why Us*

Aldous Huxley and the Search for Meaning Ronald T. Sion, 2014-01-10 Aldous Huxley author of eleven novels remains one of the towering figures of the twentieth century his work resistant to passing fads in literature This critical biography explores Huxley's lifelong quest for self actualization by intertwining the events of his life and details of the creative period that produced each book Considering Huxley's letters essays and interviews in its examination of the thematic content of each novel the text finds a man striving for the intellectual growth that would yield a sound philosophical and spiritual view of life one he infused into his work

Science and Christianity Tim Reddish, 2016-08-15 Too often conversations on Science and Christianity skate over much deeper assumptions or perceptions on the nature and interpretation of Scripture and the nature of science and of God Instead the rhetoric goes quickly towards contentious issues like evolution global warming or genetic engineering without establishing a framework of mutual understanding Consequently conversations can take place between people who completely misunderstand each other because those foundations have not been clearly articulated In this introductory book you are invited on a journey of discovery one that makes us self aware of our starting assumptions It is only from a framework of critical engagement with both science and the Bible that contemporary issues and the needs of the church and society can be addressed While the Creator is one who brings order this book also reminds us that untamed chaos also has a God ordained place within creation The author explores the element of chance that seems to be at the heart of nature and shows how this can be incorporated constructively within Christian thinking Nature is not mere mechanism and is more open than we might first think This means that miracles are scientifically plausible and prayer can really change things

Integral Ecology and the Fullness of Life Anthony J. Kelly, 2018 Explores the horizon in which a new sense of conscious connections with the biosphere of this earth the encompassing cosmic reality and the singularity of Christian revelation might come to expression

Captured by Aliens Joel Achenbach, 2003 The great minds of the human race employing ever more fabulous technology have peered into the depths of space and discovered that we exist on a tiny speck in a universe that is vast beyond comprehension But there is one thing we have yet to discover a single scrap of extraterrestrial life We have heard no signals found no alien picnic trash The aliens who allegedly abduct people in the middle of the night have a strange way of evaporating in the harsh glare of scientific scrutiny And so at the turn of the millennium we are in an intellectual fix we know the universe only through its structure its physical properties its chemistry Of its biology we can only guess Are there creatures out there like us with big brains and restless spirits Or are we for all intents and purposes alone If aliens exist if there really are intelligent creatures zooming around the galaxy then where in the nation are they Washington Post reporter Joel Achenbach the author of *Why Things Are* and a commentator for National Public Radio puts the ET debate into the context of the space program discoveries in astronomy and the hunger for meaning and spiritual nourishment in an era when science often doesn't provide the answers that people desire He finds that the topic

of extraterrestrial life is poisoned by wishful thinking by the natural human yearning to make contact with our brothers and sisters in space But ha also finds some fascinating admirable and maddening characters who have pursued the truth about extraterrestrial life Cad Sagan the brilliant astronomer who brought the cosmos to the masses Dan Goldin the cantankerous head of NASA who still believes in the dream of the Space Age Henry Harris a former Las Vegas lounge singer who is assigned the job of figuring out how to get a spaceship to Alpha Centauri and various and sundry ufologists experiencers spiritualists and channelers for whom the aliens are an ever present reality In this fascinating funny and spirited book Achenbach discovers that the search for life elsewhere leads us on a looping road back to the fundamental questions about life on Earth To think coherently about extraterrestrial life we first must come to terms with who we are why we exist and what it means to carry around in our cells an evolutionary history that took tour billion years to unfold Achenbach s message is that it is a wonderful and thrilling thing to be a sentient human being a creature capable of foolish romanticism in a universe that is mostly rocks and gas and dust and empty space

Making God Ann Long,2015-11-26 The great teachers of the Axial Age the Buddha Confucius Zoroaster the Hebrew prophets right down to Jesus began the making of the modern God They re made their inherited gods creating a personal God in their own image We may best celebrate them not by clinging to their creation but by emulating their work Developments in psychology mean that our view of persons is unlike theirs and therefore the God they made can no longer serve as ours We have to make our own So argues Ann Long in this fascinating exploration of personhood religion and moral value The revolutionary decentring of the earth in the universe Galileo was followed by the revolutionary decentring of the human in the biosphere Darwin Now we are living through the even more revolutionary decentring of the I in the world a movement from that which is normal having persons in society to that which is moral loving persons in community
