Unified Land Operations Study Guide:

Military Review, 2013 Professional Journal of the United States Army, 2013 The Operations Process (ADP 5-0)
Headquarters Department of the Army, 2019-09-28 ADP 5-0 provides doctrine on the operations process. It describes fundamentals for effective planning, preparing, executing, and assessing operations. It describes how commanders supported by their staffs employ the operations process to understand situations, make decisions, direct action, and lead forces to mission accomplishment. To comprehend doctrine contained in ADP 5-0, readers should first understand the fundamentals of unified land operations described in ADP 3-0. As the operations process is the framework for the exercise of command and control, readers should also understand the fundamentals of command and control and mission command described in ADP 6-0. Readers must also understand how the Army ethic guides decision making throughout the operations process; see Army doctrine on the Army profession. *New Principles of War* Marvin Pokrant, 2021-04. Influenced in part by the writings of Sun Tzu, Carl von Clausewitz, Henri Jomini, and other strategists, most major militaries have adopted principles of war that are widely promulgated. Marvin Pokrant argues that these commonly accepted principles fail to reflect the ideas that led to them. Looking at the fundamental and enduring concepts behind the original principles of war, Pokrant presents nine new principles of war. To illustrate his points, Pokrant uses numerous examples drawn from military history, including land, sea, and air warfare from ancient times to the present. By analyzing and reforming the principles of war, Pokrant provides a modern, relevant, and useful way to guide decisions made in times of war. Making the Soldier Decisive on Future Battlefields
National Research Council, Division on Engineering and Physical Sciences, Board on Army Science and Technology, Committee on Making the Soldier Decisive on Future Battlefields, 2013-06-10. The U.S. military does not believe its soldiers, sailors, airmen, and marines should be engaged in combat with adversaries on a level playing field. Our combat individuals enter engagements to win. To that end, the United States has used its technical prowess and industrial capability to develop decisive weapons that overmatch those of potential enemies. In its current engagement, what has been identified as an era of persistent conflict, the nation's most important weapon is the dismounted soldier operating in small units. Today's soldier must be prepared to contend with both regular and irregular adversaries. Results in Iraq and Afghanistan show that while the U.S. soldier is a formidable fighter, the contemporary suite of equipment and support does not afford the same high degree of overmatch capability exhibited by large weapons platforms. Yet it is the soldier who ultimately will play the decisive role in restoring stability. *Making the Soldier Decisive on Future Battlefields* establishes the technical requirements for overmatch capability for dismounted soldiers operating individually or in small units. It prescribes technological and organizational capabilities needed to make the dismounted soldier a decisive weapon in a changing, uncertain, and complex future environment and provides the Army with 15 recommendations on how to focus its efforts to enable the soldier and tactical small unit (TSU) to achieve overmatch. The Sociology of Military Science Colonel (US Army Ret.) Chris Paparone,2012-11-08 This groundbreaking work challenges modernist military science and explores how a more open design epistemology is becoming an attractive alternative to a military staff culture rooted in a monistic scientific paradigm The author offers fresh sociological avenues to become more institutionally reflexive to offer a variety of design

frames of reference beyond those typified by modern military doctrine Modernist military knowledge has been institutionalized to the point that blinds militaries to alternative designs organizationally and in their interventions This book seeks to reconstruct strategy and operations in designing ways and develops theories of action through multifaceted contextualizations and recontextualizations of situations showing that Military Design does not have to rely on set rational analytic decision making schemes but on seeking alternative meanings in and on action The work offers an alternative philosophy of practice that embraces the unpredictability of tasks to be accomplished Written by Colonel Paparone U S Army Ret PhD with a special chapter by two active duty officers it will appeal to all in military and security studies including professionals and policymakers **Parameters** ,2017 **Resources in Education** ,1984
