In Search of Wonderful Ideas Mary Kay Delaney, Susan Jean Mayer, 2021 Drawing on the work of Eleanor Duckworth the authors examine critical exploration in the classroom a student centered learning approach that Duckworth developed herself drawing on the work of Jean Piaget Per the authors such teaching and learning relies upon teachers developed knowledge skills and wisdom in the practices of intentional listening observing and sensitive question posing and on their ability to conduct open and materials based intellectual explorations with a diverse array of students The complex work that the authors outline has grown less visible within programs of teacher education and in classrooms as other interests prevail challenges like edTP A and standards based instruction The authors make a case for critical exploration within programs of teacher education and demonstrate across chapters the ways in which

such an approach may manifest itself within and across disciplinary domains
