University Adaptation In Difficult Economic Times International Policy Exchange:

University Adaptation in Difficult Economic Times Paola Mattei, 2014-04-02 Financial sustainability is one of the key challenges confronting Europe's universities today. Despite the fact that universities are at the centre of knowledge creation and development which itself is seen as one of the main engines of economic growth, public funding of higher education in most countries is not increasing or at least not increasing enough in real terms. Democratisation of higher education has led to the fact that the higher education budgets per student are relatively low in most European countries compared to Europe's competitors. Despite declarations of intent to increase spending on higher education and research, it is not very likely that public expenditure will grow significantly on average in Europe and therefore be able to keep up with rapidly inflating costs in the years to come. One of the reasons for this is that higher education and research have to compete with other priorities in public budgets, e.g. security, health, etc. Furthermore, the recent economic downturn has contributed to the decision in many European countries to decrease the levels of investment in higher education and research. Such trends are particularly worrisome for universities across Europe whose continuing dependence on public funding puts their future sustainability under pressure. New funding schemes and incentives have been discussed and introduced in many European higher education systems, including competitive funding schemes for research under the name of excellence policies. Despite the different national institutional configurations in Europe, higher education systems face similar demands of promoting sustainable funding models, maintaining high academic standards and equality. Thus, financial sustainability is not an end in itself; it aims to ensure that the public university's goals are reached by guaranteeing that the institution produces sufficient income to enable it to invest in high quality education and produce equitable outcomes. For these reasons, this book analyses funding reforms from a multidimensional approach.

Social Exclusion in Cross-National Perspective Robert J. Chaskin, Bong Joo Lee, Surinder Jaswal, 2019-05-28 The concept of social exclusion has been widely adopted to describe the conditions of economic, social, political, and/or cultural marginalization experienced by particular groups of people due to extreme poverty, discrimination, dislocation, and disenfranchisement. *Social Exclusion in Cross National Perspective* examines the impacts of social exclusion on disadvantaged populations across four countries: China, India, South Korea, and the United States, and provides a rich account of the interplay between globalization and social exclusion, as well as how policies and social action respond to it.

Privatization in and of Public Education Antonina Santalova, Kaire Põder, 2024 This book explains how education is becoming more privatized around the world to fit local economic and political needs. *Privatization in and of Public Education* categorizes different types of privatization as traditional or non-traditional. Traditional policies give more rights to private companies to provide education, while non-traditional policies make public schools more like businesses. The authors show that privatization can lead to more efficient schooling, but it can also create a trade-off between efficiency and equity or inclusion. The book presents a range of perspectives on the impact of privatization, including

structural ethical and subjective effects The book also covers a range of countries and regions including both developed and developing countries This helps readers understand how privatization is playing out in different contexts around the world

Beyond Market Meritocracy Haijing Dai,2025-11-10 This book examines the views and practices of employers in varied industries and establishments in Chinese societies where family care responsibilities are highly appreciated as moral virtues in the traditional culture while market neo liberalism and modern labor and family welfare systems have taken different hold of different localities and sectors Through mixed methods data and the lens of comparative research the book investigates how employ ers evaluate and treat male and female employees with various family care responsibilities **United States**

Income, Wealth, Consumption, and Inequality Diana Furchtgott-Roth,2020-09-09 United States Trends in Income Wealth Consumption and Well Being analyzes economic trends examines income inequality and discusses what can be done to increase economic mobility today **Higher Education in Societies** Gaële Goastellec,France Picard,2014-09-11

Universities are not only economic engines but societal ones This book interrogates the embeddedness of Higher Education HE systems in national social contracts and discusses how their renegotiation is at play in the organisation of students access to universities Structured around the central concept of the social contract the growing recognition of the role of HE in its implementation and regulations governing both individual and collective access Higher Education in Societies A Multiscale Perspective explores the shifting mission of HE over the years from one thought to produce an elite to one of distributive justice by presenting research at the macro meso and micro levels In bringing together researchers from different countries continents and disciplines to study the same issue through a multiscale analysis this book forms the starting line for further theoretical and methodological debate on the value of weaving together different approaches to the study of HE including historical comparative sociological organisational institutional quantitative and qualitative The World Politics of Social
