Huang Bo Nien's Xingyi Fist and Weapon Instruction was the first manual to systematically adapt a traditional Chinese martial art for modern military training. When it was first published in Chinese in 1928 it was heralded as an exciting new approach to martial arts; today it remains an important work for close combat enthusiasts, traditional martial artists, and Chinese and military historians alike. While organized as a means of progressive training from empty hand fighting to combat with weapons, no actual applications are given in Huang's original manual. Building upon a new translation of Huang's text, *The Xingyi Quan of the Chinese Army* also expands and illustrates his instructions with xingyi training drills and combat applications taught to select units of the Chinese army prior to and during World War II. These applications are not speculative reconstructions but are based on actual training methodology from the Central Military Academy at Nanjing, taught to the author by Colonel Chang Xiang Wu. Also included are theory sections and background material from the Chinese army training for empty hand and two-handed saber material never before published in any book on xingyi. **Xing**

The Boundaries of Meaning and the Formation of Law Sharron Gu, 2006-04-18. Gu's original perspective on legal history challenges established theories of law based on political science, sociology, and philosophy. She argues that language at a specific time and place determines how the law works in each culture. As each language accumulates too many meanings and connotations, the law becomes inflated by rulings, interpretations, and codified cases that overlap and contradict one another.

The End of the Revolution Wang Hui, 2011-08-01. Challenging both the bureaucratic one-party regime and the Western neoliberal paradigm, China's leading critic shatters the myth of progress and reflects upon the inheritance of a revolutionary past. In this original and wide-ranging study, Wang Hui examines the roots of China's social and political problems and traces the reforms and struggles that have led to the current state of mass depoliticization. Arguing that China's revolutionary history and its current liberalization are part of the same discourse of modernity, Wang Hui calls for alternatives to both its capitalist trajectory and its authoritarian past. From the May Fourth Movement to Tiananmen Square, *The End of the Revolution* offers a broad discussion of Chinese intellectual history and society in the hope of forging a new path for China's future.
