deals with the technological aspects denoted by cyber and also with the information operations connected to social media's role in digital struggle. The author discusses numerous mythologies about cyber warfare including its presumptively instantaneous speed that it makes distance and location irrelevant and that victims of cyber attacks deserve blame for not defending adequately against attacks. The author outlines why several widespread beliefs about cyber weapons need modification and suggests more nuanced and contextualized conclusions about how cyber domain hostility impacts conflict in the modern world. After distinguishing between the nature of warfare and the character of wars, chapters will probe the widespread assumptions about cyber weapons themselves. The second half of the book explores the role of social media and the consequences of the digital realm being a battlespace in 21st century conflicts. The book also considers how trends in computing and cyber conflict impact security affairs as well as the practicality of people's relationships with institutions and trends ranging from democracy to the Internet of Things.

Guide to Security Considerations and Practices for Rare Book, Manuscript, and Special Collection Libraries Everett C. Wilkie, 2011-09. The Guide to Security Considerations and Practices for Rare Book, Manuscript, and Special Collection Libraries is the first such book intended specifically to address security in special collection libraries. Containing nineteen chapters, the book covers such topics as background checks, reading room and general building design, technical processing characteristics, and methods of thieves' materials recovery after a theft, and security systems. While other topics are touched upon, the key focus of this volume is on the prevention of theft of rare materials. The work is supplemented by several appendices, one of which gives brief biographies of recent thieves, and another of which publishes Allen's important Blumberg Survey, which she undertook after that thief's conviction. The text is supported by illustrations, a detailed index, and an extensive bibliography. The work, compiled and edited by Everett C. Wilkie Jr., contains contributions from Anne Marie Lane, Jeffrey Marshall, Alvan Bregman, Margaret Tenney, Elaine Shiner, Richard W. Oram, Ann Hartley, Susan M. Allen, and Daniel J. Slive, all members of the ACRL Rare Books Manuscripts Section (RBMS) and experts in rare materials and the security of these materials within special collections. This work is essential reading for all those concerned with special collection security, from general library administrators to rare book librarians. c From Amazon.com
