Tieszen, 2012-12-06 Intuition has perhaps been the least understood and the most abused term in philosophy It is often the term used when one has no plausible explanation for the source of a given belief or opinion According to some sceptics it is understood only in terms of what it is not and it is not any of the better understood means for acquiring knowledge In mathematics the term has also unfortunately been used in this way Thus intuition is sometimes portrayed as if it were the Third Eye something only mathematical mystics like Ramanujan possess In mathematics the notion has also been used in a host of other senses by intuitive one might mean informal or non rigorous or visual or holistic or incomplete or perhaps even convincing in spite of lack of proof My aim in this book is to sweep all of this aside to argue that there is a perfectly coherent philosophically respectable notion of mathematical intuition according to which intuition is a condition necessary for mathematical knowledge I shall argue that mathematical intuition is not any special or mysterious kind of faculty and that it is possible to make progress in the philosophical analysis of this notion This kind of undertaking has a precedent in the philosophy of Kant While I shall be mostly developing ideas about intuition due to Edmund Husserl there will be a kind of Kantian argument underlying the entire book
