Disability, Medicine, and Healing Discourse in Early Christianity Susan R. Holman, Chris L. de Wet, Jonathan L. Zecher, 2023-08-04 Using contemporary theories drawn from health humanities this volume analyses the nature and effects of disability medicine and health discourse in a variety of early Christian literature In recent years the medical turn in early Christian studies has developed a robust literature around health disability and medicine and the health humanities have made critical interventions in modern conversations around the aims of health and the nature of healthcare Considering these developments it has become clear that early Christian texts and ideas have much to offer modern conversations and that these texts are illuminated using theoretical lenses drawn from modern medicine and public health The chapters in this book explore different facets of early Christian engagement with medicine either in itself or as metaphor and material for theological reflections on human impairment restoration and flourishing Through its focus on late antique religious texts the book raises questions around the social rather than biological aspects of illness and diminishment as a human experience as well as the strategies by which that experience is navigated The result is an innovative and timely intervention in the study of health and healthcare that bridges current divides between

Development Practitioners and Social Process Allan Kaplan, 2002-04-20 This book explores the practice of organisation development and group change in a way that will appeal to anyone involved in working towards social transformation Drawing on extensive experience gained through many years of process consultancy within the development sector mainly in Africa and Europe as well as on the work of Goethe and Jung Allan Kaplan presents a radically new approach to the understanding of organisations and communities and to the practice of social development Challenging the tendency to reduce development to a technical operation that attempts to control Kaplan's approach embraces the full complexity of the process of social transformation He describes the terrain of social change whilst simultaneously providing exercises through which practitioners can enrich their abilities to respond to the mix of chaos and order which characterise social development Exploring this delicate balance Kaplan inspires a sense of responsibility and possibility for the discipline and reveals how development groups can intervene in social situations in a manner that is both humane and effective
