

HERMETICALLY SEALING SLIDING DOOR SYSTEM BESAM UNISLIDE H

Sealed – Silent – Reliable

Besam hermetically sealing sliding door system UniSlide H is especially designed for use in clean room environments, such as operating theatres, pharmaceutical production facilities, food preparation facilities, laboratories and other areas where clean, hygienic, well-sealing doors are required.

The UniSlide H system consists of operator, door and door frames. It is easy to install for both new construction and retrofit applications. It can also be used to automate existing manual hermetic sliding doors. Although it is small and slim in appearance, it is entirely suitable for the heaviest duty applications. During the installation the operator is programmed to comply with the customer's specific requirements.

No compromise on safety

To permit safe passage between closing door and frame, the door immediately reverse if an obstruction is detected, then resume its interrupted movement at low speed to check whether the obstruction has disappeared or not. If an obstruction is detected between the opening door and surrounding wall or interior fittings, the door immediately stops and then closes after a time-delay.

The safety can be further improved by using a Besam presence detection system. People or objects in the doorway are detected and the door is then prevented from closing until it is safe to do so.

A convenience battery is available as an accessory. This is a standby supply, which gives continued operation during a short power failure.

Self-monitoring

The microprocessor has an integrated self-monitoring device, which detects any interference or faulty signals in door operation and takes necessary measures to ensure a safe operation.

The electronics are grouped in plug-in units. Each unit is subjected to a programme of stringent quality tests before delivery.
