Univern Application Form2015:

Potentials, Challenges and Prospects of Halal Tourism Development in Ethiopia Mohammed Jemal Ahmed, Atila Akbaba, 2023-02-24 This book explores the potential of halal tourism development and its implementation in Ethiopia. The insights presented assist key stakeholders to make informed decisions concerning commercial strategy, profitability and feasibility of halal tourism from the secular perspective. This innovative book offers a unique contribution to halal tourism being the first of its kind to assess halal tourism development in developing countries. It provides a clear understanding of what halal tourism means, how it has evolved and the current status of the industry. The book considers the prospects of halal tourism including the conceptual and practical challenges of halal tourism development. The example of halal tourism in Ethiopia is explored to provide a lens through which deeper understandings can be drawn on where and how to develop halal tourism. This book will be of interest to researchers, students in the disciplines of tourism, anthropology, geography, business administration and sociology. It also provides useful insights for policy makers, planners and professionals in the hospitality and tourism industry. Proceedings of the International Conference on Education Research Reza Hosseini, **The Urban Ecologies of Divided Cities** Amira Osman, John Nagle, Sabyasachi Tripathi, 2023-06-12 The book discusses how division affects the fabric of cities and people's sense of identity and agency and are reflected in physical features, architecture and urban planning. The question of divided cities represents a complex and multistranded urban ecology at once both social and spatial; it cannot be limited to a single science or discipline such as social or spatial fields. This suggests integrated and cross-disciplinary understandings as well as integrated or parallel approaches and solutions. Urban ecologies of division manifest in multiple forms. One of their most palpable expressions is conflict with parallels around the world and often with correlations in the spatial fabric. Violence in such contexts is often a surface expression of deeper socio-economic or ideological differences. Whether as a result of intervention by authority or by dissent between groups, a divided city inevitably becomes a place of conflict in various forms and intensity, eroding the joy of living and sense of collective belonging to the detriment of all. In effect, it erodes the collective advantage of being part of a more unified society. A city exists in collections of social structures which mutually form a society. A divided city implies divided social structures and in consequence a divided society. The papers compiled in this book present many case studies of divided cities, discussing the different causes of divisions and their effects on societies. Some of the causes can be linked to conflicts, wars, colonialism or legislative political systems. In response to the serious challenges resulting from these divisions, the book aims to provide opportunities for new approaches and possibilities for new interventions and solutions, making it significant to urban planners, architects and policymakers.
