Voluntary Euthanasia And The Common Law:

Voluntary Euthanasia and the Common Law Margaret Otowski,1997 Margaret Otowski investigates the complex and controversial issue of active voluntary euthanasia She critically examines the criminal law prohibition of medically administered active voluntary euthanasia in common law jurisdictions and carefully looks at the situation as handled in practice The evidence of patient demands for active euthanasia and the willingness of some doctors to respond to patients requests is explored and an argument for reform of the law is made with reference to the position in the Netherlands where active voluntary euthanasia is now openly practiced *Criminal Laws in Australia* David Lanham,David Wood,Bronwyn Bartal,Rob Evans,2006 Aims to present a unified picture of the core aspects of Australian criminal law "Text, Cases & Materials on Medical Law " Marc Stauch,2017-07-05 Lucid and logical in structure this new edition previously entitled Sourcebook on Medical Law draws together a wide range of essential material including extracts from statutes cases and academic commentary from medical law an area which is fast becoming an important part of undergraduate syllabuses Fully updated to take account of recent developments in this dynamic area of law it examines two major pieces of legislation the Mental Capacity Act 2005 and the Human Tissue Act 2004 as well as a significant amount of new case law including the House of Lords decisions in *Chester v Afshar* and *Gregg v Scott* and the Court of Appeal decision in *R on the application of Burke v GMC* and others Divided into two parts it covers the general principles that permeate medical law exploring illness and the ethics of care and healthcare in England and Wales and consent to treatment confidentiality and medical malpractice issues which arise in relation to specific areas of medical treatment including infertility treatment and surrogacy pregnancy and abortion treating the incompetent the mentally ill medical research organ transplants and euthanasia This textbook is an invaluable reference tool for all those studying medical law as well as those studying medicine **Bioethics, Medicine and the Criminal Law: Volume 1, The Criminal Law and Bioethical Conflict: Walking the Tightrope** Amel Alghrani,Rebecca Bennett,Suzanne Ost,2012-11-01 Who should define what constitutes ethical and lawful medical practice Judges Doctors Scientists Or someone else entirely This volume analyses how effectively criminal law operates as a forum for resolving ethical conflict in the delivery of health care It addresses key questions such as how does criminal law regulate controversial bioethical areas What effect positive or negative does the use of criminal law have when regulating bioethical conflict And can the law accommodate moral controversy By exploring criminal law in theory and in practice and examining the broad field of bioethics as opposed to the narrower terrain of medical ethics it offers balanced arguments that will help readers form reasoned views on the ethical legitimacy of the invocation and use of criminal law to regulate medical and scientific practice and bioethical issues Routledge Handbook of Global Health Rights Clayton Ó Néill,Charles Foster,Jonathan Herring,John Tingle,2021-05-30 This book examines the idea of a fundamental entitlement to health and healthcare from a human rights perspective The volume is based on a particular conceptual reasoning that balances critical

thinking and pragmatism in the context of a universal right to health. Thus the primary focus of the book is the relationship or contrast between rights based discourse, jurisprudential arguments and real life healthcare contexts. The work sets out the constraints that are imposed on a universal right to health by practical realities such as economic hardship in countries lack of appropriate governance and lack of support for the implementation of this right through appropriate resource allocation. It queries the degree to which the existence of this legally enshrined right and its application in instruments such as the International Covenant on Economic Social and Cultural Rights ICESCR and the Universal Declaration of Human Rights UDHR can be more than an ephemeral aspiration but can actually sustain, promote and instil good practice. It further asks if social reality and the inequalities that present themselves therein impede the implementation of laudable human rights particularly within marginalised communities and cadres of people. It deliberates on what states and global bodies do or could do in practical terms to ensure that such rights are moved beyond the aspirational and become attainable and implementable. Divided into three parts, the first analyses the notion of a universal inalienable right to health care from jurisprudential, anthropological, legal and ethical perspectives. The second part considers the translation of international human rights norms into specific jurisdictional healthcare contexts. With a global perspective it includes countries with very different legal, economic and social contexts. Finally, the third part summarises the lessons learnt and provides a pathway for future action. The book will be an invaluable resource for students, academics and policymakers working in the areas of health law and policy and international human rights law.
