Further, most important, it is of money can be saved by avoiding the costs a garage visit charges to cover its labour and materials.

The manual has drawings and descriptions to show the location of the various components so that their names can be understood. Then the parts are described and photographed in order to show exactly as they are in a vehicle not in the work.

Its arrangement

The manual is divided into three Chapters, each covering a logical sub-division of the vehicle. The Chapters are: Chapter 1, the Systems, numbered with single figures, eg 11 and the Systems and components (or sub-components, with additional numbers following on from the figure) they are in, eg 11.1, 11.2, 11.3 etc.

It is hoped, therefore, that in those parts where there is a detailed sequence of operations to be carried out. These are in the form of illustrations, figures and photographs. The figures are numbered in

sequence with decimal numbers, according to their position in the Chapter — eg Fig. 8.4 is the fourth drawing (illustration) in Chapter 8. Photographs carry the same number (either individually or in related groups) as the figure or text section to which they refer.

There is an alphabetical index at the back of the manual as well as a contents list in the front. Each Chapter is also preceded by its own individual contents list.

References to the left or right of the vehicle are in the sense of a person in the driver's seat facing forward.

Unless otherwise stated, nuts and bolts are removed by turning anti-clockwise, and tightened by turning clockwise.

Various illustrations continuously make changes to specifications and recommendations, and these will contain all necessary information of the latest standards.

The text gives you the sequence of information given in this manual, but certain manufacturers make alterations and design changes during the production run of a particular vehicle of which they do not advise us.
