Understanding Human Information Behavior Beth St. Jean, Ursula Gorham, Elizabeth Bonsignore, 2021-03-25 This introductory textbook aims to provide undergraduate students in information science and related disciplines with an applied grounding in information behavior. The book's primary focus is to provide explicit links between information behavior and the careers that students will pursue within the information professions. With a deeper understanding of information behavior, students will be better equipped to address the many types of barriers that frequently prevent people from effectively and efficiently accessing, understanding, managing, and/or using the information they need in the real world. The first six chapters of the book provide students with the fundamental building blocks of information behavior: introduce them to important related concepts and provide a deep dive into information literacy, digital literacy, the digital divide, and digital inclusion. Chapters 7 through 12 introduce students to the scholarly communication system, providing guidance on how to find, read, and critically evaluate information behavior studies. Also explored in these chapters are the various methods used to investigate and understand people's information behaviors. Topics covered include research design, research methods, research ethics, user needs assessment, and human computer interaction and associated design methods. This part of the book also covers some of the major information behavior models and theories that have been developed to describe, predict, and/or explain people's information behaviors. In chapters 13 through 16, the authors provide an in-depth look into their own information behavior research areas, including consumer health, information behavior and health justice, youth information behavior, legal information behavior, and access to justice, and information behavior in libraries. In the final chapter, students are first introduced to a wide range of careers within the information professions and then taken along on a deep dive into 10 specific jobs, with a special focus on the thread of information behavior that pervades the roles and responsibilities commonly associated with these positions. Each chapter begins with one or more scenarios illustrating concepts covered in the chapter and ends with discussion questions.

Communication in Paramedic Practice Glyn O'Toole, 2023-10-01 The ability to communicate well is the single most important skill for a paramedic. But despite an emphasis on communication in paramedicine, assessment, and standards, there has never been a resource specifically tailored to the unique environments in which paramedics practise. This new book fills that gap. *Communication in Paramedic Practice* is designed as a primer on the importance for paramedics of communicating well and how to achieve this in real life. It encourages self-reflection on your own communication style and covers important considerations such as listening, managing distress, being culturally responsive, and non-verbal communication. Written by experts in this field and full of relevant examples and opportunities to practise, this book will help you communicate comfortably and confidently for better patient outcomes, increased workplace safety, and more efficient transfer of information. Four sections cover the significance of interpersonal communication, developing self-awareness, managing realities of communication as a paramedic, and scenarios for practice. Promotes self

reflection on your personal communication style and habits Introduces the strategies and skills you need for real life

Understanding Human Ecology Robert Dyball, Barry Newell, 2023-06-30 Understanding Human Ecology offers a
coherent conceptual framework for human ecology a clear approach for understanding the many systems we are part of and
for how we frame and understand the problems we face Blending natural social and cognitive sciences with dynamical
systems theory this key text offers systems approaches that are accessible to all from the undergraduate student to
policymakers and practitioners across government business and community In the first edition road tested and refined over a
decade of teaching and workshops the authors built a clear inspiring and important framework for anyone approaching the
management of complex problems and the transition to sustainability Fully updated for the second edition the book now goes
further in using systems thinking principles to explain fundamental processes of change in social ecological systems Revised
case examples provide a working application of these principles whilst a new discussion of the hierarchical structure of
complex systems is included to guide practical policymaking This new edition is essential reading for students and scholars of
human ecology environmental ethics and sustainability studies Media Studies: Content, audiences, and production Pieter
Jacobus Fourie, 2001 This book includes theoretical approaches as well as a production section that focuses on basic
techniques and introductory applications of media studies
