Understanding Second Language Acquisition, Second Edition Lourdes Ortega, 2016-01-01. Second Language Acquisition is a theoretical, experimental and fast-paced field of study which looks at and seeks to understand how native speakers of one language learn to speak another language fluently. *Understanding Second Language Acquisition* provides an approachable but authoritative introduction to this area of linguistics. The essentials are clearly explained with pointers for further study. The author focuses on the key notions involved rather than arguing for a particular theoretical position. This second edition is fully up to date and includes the latest empirical developments and theoretical refinements in second language acquisition, such as new sections on age and learner language development. New features also include end of chapter questions for revision and further discussion and a full glossary of terms. The extensive online resources have been updated and expanded to include more powerpoint slides for lecturers and reading suggestions for students and are available at www.routledge.com/cw/ortega. This is the ideal book for anyone looking for an accessible but comprehensive introduction to second language learning.

Understanding Second Language Acquisition 2nd Edition Rod Ellis, 2015-10-26. In the 30 years since Rod Ellis first published the award-winning *Understanding Second Language Acquisition*, it has become a classic text. This new fully updated edition continues to provide an authoritative and highly readable introduction to key areas of theory and research in second language acquisition. Ellis presents a comprehensive overview of the different theories in this field and examines critical reactions to them. The book reflects recent trends in looking at cognitive and social aspects of second language acquisition as well as examining the roles played by implicit and explicit instruction in language learning. An excellent and much-needed in-depth review of the research on how children and literate adults learn a second language. Ellis provides a sound knowledge base for language teachers and beginning graduate students in applied linguistics, focusing on relevant findings of research on second language learning by children and literate adults in both naturalistic and instructed contexts. Elaine Tarone, Director of the Center for Advanced Research on Language Acquisition, University of Minnesota. Additional online resources are available at www.oup.com/elt/teacher/understandingsla. Rod Ellis is the Distinguished Professor of Applied Language Studies in the School of Cultures, Languages and Linguistics in the University of Auckland. Oxford Applied Linguistics Series Advisers: Anne Burns and Diane Larsen Freeman.
