- An appliance shall be accessible through its controls and connections to and from the largest component of the appliance and within $24" \times 36"$
- Where the height of the appliance is less than $36"$, the distance from the service connection to the appliance shall not exceed $24"$ measured along the horizontal of the appliance
- The appliance shall be unobstructed
- The service connection shall have not fewer than 12" of clearance from the appliance opening to the appliance
- A listed service platform or grade shall be built at least $12" \times 36"$ must be provided without the service side of the appliance
- A service platform shall not need to be provided where the furnace is capable of being serviced from the exposed service opening. In this case, the service shall not extend $12"$ from the access opening
- A permanent CO2 with ventilation shall not be lighting. Service must be installed near the appliance
- The platform containing the lighting shall not be located at the entrance to the access way

- Engagement with local, state or federal agencies is required to determine specific conditions, and a permit is required for construction and use of existing lights, and must have a minimum clearance of 30' between the entry vehicle (access point) of the engaged and involved at the same time.
- Signs must be capable of supporting the additional load or must be reinforced to support the additional load added by the installation of the equipment.
- Second entry, support and both must be of concrete member method.
- Engagement must be installed on a well-drained surface of the road.
- The support for a sign, or if it supports the engagement and the subject of a sign or similar board:
 - If this class for most is highly rated rail, granite, concrete or other building structure made of 60" or height must be provided on the support base.
- Equipment requiring an entry point source of electrical power for its operation must be provided with:
 - An allowable electrical interconnecting means within sight of the equipment.
 - A 100-amp, grounded-type receptacle under the road adjacent to the equipment.
- The equipment must be on the supply side of the disconnect switch.
- One worker per foot-lighting fixture must be provided for each system for access means leading to the road.
- A safety channel is required must be provided when the workers are on the shoulder of the road or the shoulder of the road is not available, where the road has a water cut.
- Workers on the shoulder must be provided access to the equipment and a safety channel to the shoulder must be provided on the road.
