Recent Advances in Material, Manufacturing, and Machine Learning Bjorn Schuller, Rajeev Gupta, Rakesh Mote, Abhishek Sharma, J.P. Giri, R.B. Chadge, 2024-06-17 The main aim of the 2nd international conference on recent advances in materials manufacturing and machine learning processes 2023 RAMMML 23 is to bring together all interested academic researchers scientists engineers and technocrats and provide a platform for continuous improvement of manufacturing machine learning design and materials engineering research RAMMML 2023 received an overwhelming response with more than 530 full paper submissions After due and careful scrutiny about 120 of them have been selected for presentation The papers submitted have been reviewed by experts from renowned institutions and subsequently the authors have revised the papers duly incorporating the suggestions of the reviewers This has led to significant improvement in the quality of the contributions Taylor Francis publications CRC Press have agreed to publish the selected proceedings of the conference in their book series of Advances in Mechanical Engineering and Interdisciplinary Sciences This enables fast dissemination of the papers worldwide and increases the scope of visibility for the research contributions of the authors

Proceedings of the 9th International Conference on Mechanical Manufacturing Technology and Material Engineering Jiang Guo, Alam Md. Mahbub, Ying-Ren Chien, 2025-04-28 This book offers a comprehensive examination of the latest advancements in mechanical manufacturing technology and material engineering as presented at the 9th International Conference on Mechanical Manufacturing Technology and Material Engineering MMTME 2024 It delves into the forefront of research in areas like intelligent manufacturing process and structure optimization intelligent mechanical design and simulation analysis The book is structured to highlight significant innovations that are poised to redefine manufacturing processes enhance material performance and drive sustainability in production Each chapter provides in depth analysis of emerging technologies and their practical applications backed by recent case studies and expert insights Key topics such as the integration of AI and IoT in manufacturing advancements in 3D and 4D printing technologies and the development of new sustainable materials are explored These are critical for pushing the boundaries of what is possible in manufacturing and materials science today This book is significant as it not only encapsulates state of the art research but also provides a vision for future directions in the field It sets out to solve problems related to efficiency cost effectiveness and environmental impact in manufacturing offering new perspectives and solutions to researchers and professionals The target audience includes academic researchers industry professionals and engineers in the fields of mechanical manufacturing and material engineering

Handbook on Advanced Design and Manufacturing Technologies for Biomedical Devices Andrés Díaz Lantada, 2014-07-08 The last decades have seen remarkable advances in computer aided design engineering and manufacturing technologies multi variable simulation tools medical imaging biomimetic design rapid prototyping micro and nanomanufacturing methods and information management resources all of which provide new horizons for the Biomedical Engineering fields and the Medical Device Industry Advanced Design and Manufacturing Technologies for Biomedical Devices covers such topics in depth with an applied perspective and providing several case studies that help to analyze and understand the key factors of the different stages linked to the development of a novel biomedical device from the conceptual and design steps to the prototyping and industrialization phases Main research challenges and future potentials are also discussed taking into account relevant social demands and a growing market already exceeding billions of dollars In time advanced biomedical devices will decisively change methods and results in the medical world dramatically improving diagnoses and therapies for all kinds of pathologies But if these biodevices are to fulfill present expectations today s engineers need a thorough grounding in related simulation design and manufacturing technologies and collaboration between experts of different areas has to be promoted as is also analyzed within this handbook

Bioinspired Applications in Artificial and Natural Computation Jose Mira, Jose-Ramon Alvarez Sanchez, José M. Ferrández, Felix Paz, Javier Toledo, 2009-06-12 The two volume set LNCS 5601 and LNCS 5602 constitutes the refereed proceedings of the Third International Work Conference on the Interplay between Natural and Artificial Computation IWINAC 2009 held in Santiago de Compostela Spain in June 2009 The 108 revised papers presented are thematically divided into two volumes The first volume includes papers relating the most recent collaborations with Professor Mira and contributions mainly related with theoretical conceptual and methodological aspects linking AI and knowledge engineering with neurophysiology clinics and cognition The second volume contains all the contributions connected with biologically inspired methods and techniques for solving AI and knowledge engineering problems in different application domains
