## COMPACT EXCAVATOR EC15

### Ultra performance

The EC15 is designed to be available with two undercarriage versions:  
• a 90° and 45° fixed undercarriage to get at any angle  
• a variable width undercarriage 90° to 170° for the improved ground mobility without sacrificing ability to access narrow sites

### Fast travelling to and from

The EC15 is provided with two travel speeds, including a fast speed to speed up machine travel on the site

### The boom effect for working despite a wall

The hydraulic effect of the boom makes it possible to reduce the overall dimensions of the excavator and/or work despite a wall

### Quick coupling

The exclusive quick coupling enables an excavator to be loaded quickly without having the operator get involved in the other two phases of hydraulic

### Compact rear impact protection

The rear compact dimensions of the Volvo excavator make them so work safely in the narrowest sites. The rear impact shape of the counterweight provides the machine with excellent protection against all impacts

### A steady top element

The steady top plate multiplies the bearing surface on the chassis. It can hold another 4 tons more than the fixed top for a better distribution of stress and therefore less wear and less deformation

### Smooth and easy precise controls

The smoothness and precision of the programmed controls make the work extremely easy in the most difficult and tight

### Short steering times without delay

The hydraulic control allows the operator to quickly achieve a collective gain. The rear wheel on the chassis makes it possible to maintain a constant speed in all directions
