Daxton R. Stewart, 2019-08-20. Attorney and legal scholar Daxton Stewart examines the intersection of media law and science fiction, exploring the past, present, and future of communication technology and policy debates. Science fiction offers a vast array of possibilities, anticipating future communication technologies and their implications on human affairs. In this book, Stewart looks at potential legal challenges presented by plausible communication technologies that may arise 20 or 50 or 100 years from today. Performing what he calls speculative legal research, Stewart identifies the kinds of topics we should be talking about, relating to speech, privacy, surveillance, and more, and considers the debates that would be likely to arise if such technologies become a reality. Featuring interviews with prominent science fiction authors and legal scholars and a foreword by Malka Older, this book considers the speculative solutions of science fiction and their implications in law and policy scholarship. Chapters feature specific literary examples to examine how cultural awareness and policy creation are informed by fictional technology, future societies, and legal disputes. Looking forward beyond traditional legal research and scholarship to the possible and even very likely future of communication technology, this fascinating work of speculative legal research will give students and scholars of media law, science fiction, and technology much to discuss and debate. **Futurism:**

Their mission: Preparing the people of today for the world of tomorrow. Based on one of Futurism's most viral recurring features, this collection of cartoons parodies our wild imaginings and presents a unique and distinct vision of what's in store for us, from the good to the bad to the downright absurd. The cartoons cover topics ranging from virtual reality and artificial intelligence to space colonization, robot ethics, mass surveillance, technology addiction, human longevity, and more. Nothing is impossible or off-limits. After all, this is the future we're talking about. **Karl Lagerfeld: A Line of Beauty** Andrew Bolton, Tadao Ando, Anita Briey, Stefania D'Alfonso, Olivia Douchez, Amanda Harlech, Patrick Hourcade, Mellissa Huber, Nicole Lefort, Kai Toussaint Marcel, Jacqueline Mercier, Loïc Prigent, Anna Wintour, 2023-05-01. This investigation into

Karl Lagerfeld's 1933-2019 artistry explores his extraordinary sixty-five year career from the designs for Chloé and Fendi in the 1960s and 1970s to his celebrated leadership in the 1980s and beyond at Chanel and his own label. Inspired by the line of beauty theorized by eighteenth-century English painter William Hogarth, this dazzling publication pursues the straight and serpentine lines and their intersections in Lagerfeld's work as a means of understanding his unique creative process.

Sisters of Tomorrow Lisa Yaszek, Patrick B. Sharp, 2016-06-07 Anthology of stories, essays, poems, and illustrations by the women of early science fiction. For nearly half a century, feminist scholars, writers, and fans have successfully challenged the notion that science fiction is all about boys and their toys, pointing to authors such as Mary Shelley, Clare Winger Harris, and Judith Merril as proof that women have always been part of the genre. Continuing this tradition, *Sisters of Tomorrow: The First Women of Science Fiction* offers readers a comprehensive selection of works by genre luminaries, including author C. L. Moore, artist Margaret Brundage, and others who were well known in their day, including poet Julia Boynton Green, science journalist L. Taylor Hansen, and editor Mary Gnaedinger. Providing insightful commentary and context, this anthology documents how women in the early twentieth century contributed to the pulp magazine community and showcases the content they produced, including short stories, editorial work, illustrations, poetry, and science journalism. Yaszek and Sharp's critical annotation and author biographies link women's work in the early science fiction community to larger patterns of feminine literary and cultural production in turn-of-the-twentieth-century America. In a concluding essay, the award-winning author Kathleen Ann Goonan considers such work in relation to the history of women in science and engineering and to the contemporary science fiction community itself.

[A Mind for Tomorrow](#) Erika Erdmann, David Stover, 2000-03-30 Stover and Erdmann deal with the crises confronting today's world and argue that solutions will come not from new technology nor in retreating to an idealized agrarian past but by overhauling the beliefs that structure society. They link the dilemmas facing civilization to a fundamental rift running through society: one between religion and the humanities, rooted in subjective experience, and science, which emphasizes objective knowledge. They suggest a promising way of closing this rift, found in the work of Nobel Laureate and neuroscientist Roger W. Sperry. They examine Sperry's lifework, including his famous split-brain research, and show how it led him to propose a theory of consciousness that challenged science's dismissal of subjective experience as irrelevant. By seeing consciousness as an emergent causal property of brain function, Sperry reinstated subjective experience into the scientific worldview, laid the foundation for the cognitive revolution that has since swept through psychology, and created a means by which science can help create ethical systems better able to deal with today's challenges. Stover and Erdmann conclude by looking at ways in which others have built upon Sperry's ideas and they hold out the hope that with the creation of belief systems more compatible with science, a way out of humanity's current troubles may indeed be found. The result is an excursion through a world of exciting ideas and a book sure to absorb anyone interested in the fate of our species and how that fate might be influenced for the better. Students, researchers, scholars, and concerned citizens, particularly interested in

cognitive psychology science and society and futures studies will find the book intriguing
