Vijftig Jaar Natuurbescherming In Nederland:

Erfgoed Frans Grijzenhout, 2007 History geography and auxiliary disciplines Culture and history **Vijftig jaren beoefening van de geschiedenis der geneeskunde, wiskunde en natuurwetenschappen in Nederland, 1913-1963** Genootschap voor Geschiedenis der Geneeskunde, Wiskunde, en Natuurwetenschappen (Netherlands), B. P. M. Schulte, 1963

Natuurbeschermers Kristian Mennen, 2025-03-03 De tijd tussen 1930 en 1960 is beschreven als een tijd van magere jaren voor de natuurbescherming in Nederland Deze drie decennia waren immers de tijd van economische crisis massawerkloosheid van oorlog en vijf jaar Duitse bezetting gevolgd door een moeizame periode van wederopbouw en de moderne ontwikkeling van landbouw en industrie Natuurbescherming had intussen geen prioriteit Het was destijds letterlijk nog ondenkbaar om boerenbedrijven te sluiten om natuur meer ruimte te geven Tussen 1930 en 1960 ging in Nederland heel veel natuur verloren en tegelijkertijd maakten weinig mensen zich daar zorgen om Wat deden de natuurbeschermers in die tijd Er bestond al een dicht netwerk van mensen verenigingen stichtingen en overheidsinstanties die zich bezighielden met de bescherming van natuur en landschap Hoe werkten zij met elkaar samen Welke strategieën en welke argumenten gebruikten ze om hun thema against the odds in ongunstige omstandigheden toch op de politieke en maatschappelijke agenda te plaatsen Dit boek vertelt het verhaal van deze natuurbeschermers van de mensen hun organisaties hun denken en handelen **The Book of Nature in Early Modern and Modern History** Klaas van Berkel, Arie Johan Vanderjagt, 2006 From 22-25 May 2002 the University of Groningen hosted an international conference on The Book of Nature Continuity and change in European and American attitudes towards the natural world From Antiquity down to our own time theologians philosophers and scientists have often compared nature to a book which might under the right circumstances be read and interpreted in order to come closer to the Author of nature God The reading of this book was not regarded as mere idle curiosity but it was seen as leading to a deeper understanding of God's wisdom and power and it culturally legitimated and promoted a positive attitude towards nature and its study A selection of the papers which were delivered at the conference has been edited in two volumes The first book was published as The Book of Nature in Antiquity and the Middle Ages this second volume is devoted to the history of that concept after the Middle Ages **Marc-ante Landschappen**, 2008

Protecting Nature C. S. A. van Koppen, William T. Markham, 2008-01-01 This book makes a long overdue contribution to the ongoing debate on the role of nature protection organizations and networks The editors have brought together eleven respected sociologists to trace and evaluate the links between nature protection organizations and society in eight European countries and the United States Using analytical frameworks ranging from organization theory to social movements approaches the authors describe the social networks that organizations promoting nature protection have woven which in turn have helped many of them to survive and adapt to changing political and economic circumstances Uncovering these strategies is crucial to understanding how environmental issues are being dealt with via new forms of governance today The

book will be very useful to scholars in organizational studies social movements environmental sociology and environmental politics Matthias Gross Helmholtz Centre for Environmental Research UFZ Leipzig Germany By examining the evolution role and influence of nature protection organizations and networks in eight European countries and the United States this book addresses a long standing gap in comparative research on Western Environmentalism It will appeal to all scholars and students with an interest in environmentalism nature protection and social movement studies Lars H Gulbrandsen the Fridtjof Nansen Institute Norway This book offers a comparative analysis of organizations and networks involved in nature protection in France Germany Italy the Netherlands Norway Poland Sweden the UK and the USA It traces their development from their origins more than a century ago to the present day Throughout this period nature protection has remained an enduring concern to civil society and continues to be a major stream within environmentalism However strategies public support and political success vary greatly among the countries studied Combining rich empirical evidence and theoretical analysis the book sheds light on the important challenges nature protection faces today Providing a detailed description of all the major nature protection organizations and networks including overviews of their current membership activities and as far as available budgets Protecting Nature will be of great interest to lecturers and postgraduate students in social science fields as well as researchers in the fields of environmental policy environmental NGOs social movements civil society nature management and policy Members of nature protection environmental and other civil society organizations who seek a better understanding of the historical development of nature protection organizations and networks as well as the strategies employed by those organizations will also find much to interest them in this book Wilderness Protection in Europe C. Schoute, Peter A. Finke, Frank R. Veeneklaas, Henk P. Wolfert, 2012-12-06 Rural areas need to fulfil a large variety of functions and to accommodate many activities The complexity of the problems limited funds and the almost irreversible character of some interventions result in a compelling need to evaluate ex ante the effects of alternative solutions for designation of land for measures to develop infrastructure and for soil and water management Scenario studies are undertaken to help manage the complexity to place bounds on uncertainties and to create new visions After an overview of the nature variety and scope of scenario studies the book illuminates various European examples and reviews under the following headings regional soil and water management nature development and landscape quality rural planning and the future of regions *Ecological Engineering* Hein van Bohemen, 2005 Verhandeling - Rijksinstituut voor Natuurbeheer Rijksinstituut voor Natuurbeheer, 1971 *Nederland weer mooi* Jaap Dirkmaat, 2006 Gids met beschrijvingen uit het historische cultuurlandschap in Nederland landwegen sloten heggen houtwallen bomendijken etc **Notulen van het verhandelde bij de Staten van Overijssel gedurende de zittingen van het jaar ...**, *Managing Northern Europe's Forests* K.
