Village Hamlet And Field Changing Medieval Settlements In Central England:

Village, Hamlet and Field Carenza Lewis, Patrick Mitchell-Fox, Christopher Dyer, 1997 Why is the countryside in some parts of England and Continental Europe dominated by large villages while in many regions looser groupings of houses in hamlets or isolated farms provide the main forms of settlement The answer lies in the period c 850 1200 when the settlement pattern which still survives was created

Middle Saxon' Settlement and Society: The Changing Rural Communities of Central and Eastern England Duncan Wright, 2015-05-31 This book explores the experiences of rural communities who lived between the seventh and ninth centuries in central and eastern England Combining archaeology with documentary place name and topographic evidences it provides unique insight into social economic and political conditions in Middle Saxon England

Deserted Villages Revisited Christopher Dyer, Richard Jones, 2010 Assembling leading experts on the subject this account explores the circumstances surrounding the disappearance of thousands of villages and smaller settlements in England and Wales between 1340 and 1750 By revisiting the deserted villages this breakthrough study addresses questions that have plagued archaeologists geographers and historians since the 1940s including why they were deserted why some villages survived while others were abandoned and who was responsible for their desertion offering a series of exciting insights into the fate of these fascinating sites

A Social History of England, 900-1200 Julia Crick, Elisabeth van Houts, 2011-04-21 The years between 900 and 1200 saw transformative social change in Europe including the creation of extensive town dwelling populations and the proliferation of feudalised elites and bureaucratic monarchies In England these developments were complicated and accelerated by repeated episodes of invasion migration and changes of regime In this book scholars from disciplines including history archaeology and literature reflect on the major trends which shaped English society in these years of transition and select key themes which encapsulate the period The authors explore the landscape of England its mineral wealth its towns and rural life the health behaviour and obligations of its inhabitants patterns of spiritual and intellectual life and the polyglot nature of its population and culture What emerges is an insight into the complexity diversity and richness of this formative period of English history

Thorps in a Changing Landscape Paul Cullen, Richard Jones, David Parsons, 2011-03 Considering the minor settlements of England's Danelaw villages known as thorps or throps this history demonstrates how place name evidence can be used to understand early cultures By integrating linguistic and archaeological approaches it establishes a compelling connection between the creation of these place names and the fundamental changes taking place in the English landscape between AD 850 and 1250 The integral role of thorps in revolutionizing agricultural practice at that time is thoroughly analyzed

The Archaeology of Medieval Villages Currently Inhabited in Europe Jesús Fernández Fernández, Margarita Fernández Mier, 2019-08-29 Archaeological interventions in European rural settlements have largely focussed on villages abandoned during the last millennium Most hamlets and villages of medieval origin remain inhabited however and excavations have been scarce This

book details excavations of inhabited sites in the UK the Netherlands France Scandinavia and Spain **Farming Transformed in Anglo-Saxon England** Mark McKerracher, 2018-02-21 Anglo Saxon farming has traditionally been seen as the wellspring of English agriculture setting the pattern for 1000 years to come but it was more important than that A rich harvest of archaeological data is now revealing the untold story of agricultural innovation the beginnings of a revolution in the age of Bede Armed with a powerful new dataset Farming Transformed explores fundamental questions about the minutiae of early medieval farming and its wider relevance How old were sheep left to grow for example and what pathologies did cattle sustain What does wheat chaff have to do with lordship and the market economy What connects ovens in Roman Germany with barley maltings in early medieval Northamptonshire And just how interested were Saxon nuns in cultivating the opium poppy Farming Transformed is the first book to draw together the variegated evidence of pollen sediments charred seeds animal bones watermills corn drying ovens granaries and stockyards on an extensive regional scale The result is an interdisciplinary dataset of unprecedented scope and size which reveals how cereal cultivation boomed and new watermills granaries and ovens were erected to cope with and flaunt the fat of the land As arable farming grew at the expense of pasture sheep and cattle came under closer management and lived longer lives yielding more wool dairy goods and traction power for plowing These and other innovations are found to be concentrated at royal aristocratic and monastic centers placing lordship at the forefront of agricultural innovation and farming as the force behind kingdom formation and economic resurgence in the seventh and eighth centuries An Eoraip: Gaelic Ireland in Medieval and Early Modern Europe, 2025-08-14 Medieval and early modern Irish scholars thought of themselves as Europeans As an expression of territorial association this belief reflects both their familiarity with the geographical traditions of Antiquity and the integration of their society into economic cultural and political networks that spanned the continent But it was also an articulation of a perceived cultural affinity often denied in modern scholarship The chapters in this volume examine the many and various ways that Gaelic Ireland was integrated into the broader European world focusing on literature and learning real world politics economics and travel and questions of identity Contributors are Rachel Brody Michael Clarke Simon Egan Deborah Hayden Brendan Kane Victoria L McAlister Ken Donnchu Patricia Palmer Brian Stone and Patrick Wadden Town and Country in the Middle Ages: Contrasts, Contacts and Interconnections, 1100-1500: No. 22 Christopher Dyer, Kate Giles, 2024-11-01 Proceedings of the Society's conference held at the University of York in April 2002 This book brings together the papers presented at the Society for Medieval Archaeology's spring conference held in York in 2002 The conference set out to reunite urban and rural archaeology Papers define the differences between town and country compare the two ways of life trace the interconnecting links between townspeople and country dwellers and show how they interacted and influenced one another Contributors include archaeologists concerned with artefacts buildings environment and regions historical geographers working on urban space and historians interested in material culture Coping with Crisis: The Resilience and Vulnerability

of Pre-Industrial Settlements Daniel R. Curtis, 2016-05-13 Why in the pre industrial period were some settlements resilient and stable over the long term while other settlements were vulnerable to crisis Indeed what made certain human habitations more prone to decline or even total collapse than others All pre industrial societies had to face certain challenges exogenous environmental hazards such as earthquakes or plagues economic or political hazards from outside such as warfare or expropriation of property or hazards of their own making such as soil erosion or subsistence crises How then can we explain why some societies were able to overcome or negate these problems while other societies proved susceptible to failure as settlements contracted stagnated were abandoned or even disappeared entirely This book has been stimulated by the questions and hypotheses put forward by a recent disaster studies literature in particular by placing the intrinsic arrangement of societies at the forefront of the explanatory framework Essentially it is suggested that the resilience or vulnerability of habitation has less to do with exogenous crises themselves but on endogenous societal responses which dictate a the extent of destruction caused by crises and the capacity for society to protect itself and b the capacity to create a sufficient recovery By empirically testing the explanatory framework on a number of societies between the Middle Ages and the nineteenth century in England the Low Countries and Italy it is ultimately argued in this book that rather than the protective functions of the state or the market or the implementation of technological innovation or capital investment the most resilient human habitations in the pre industrial period were those than displayed an equitable distribution of property and a well balanced distribution of power between social interest groups Equitable distributions of power and property were the underlying conditions in pre industrial societies that all

Faxton Lawrence Butler, Christopher Gerrard, 2020-09-07 The village of Faxton in Northamptonshire was only finally deserted in the second half of the 20th century Shortly afterwards between 1966 and 1968 its medieval crofts were investigated under the direction of archaeologist Lawrence Butler At the time this was one of the most ambitious excavations of a deserted medieval settlement to have been conducted and although the results were only published as interim reports and summaries Butler's observations at Faxton were to have significant influence on the growing academic and popular literature about village origins and desertion and the nature of medieval peasant crofts and buildings In contrast to regions with abundant building stone Faxton revealed archaeological evidence of a long tradition of earthen architecture in which so called mud walling was successfully combined with other structural materials The rescue excavations at Faxton were originally promoted by the Deserted Medieval Village Research Group and funded by the Ministry of Public Buildings and Works after the extensive earthworks at the site came under threat from agriculture Three areas were excavated covering seven crofts In 1966 Croft 29 at the south east corner of the village green revealed a single croft in detail with its barns yards and corn driers in 1967 four crofts were examined together in the north west corner of the village in an area badly damaged by recent ploughing and finally an area immediately east of the church was opened up in 1968 In all some 4000m² were investigated in 140 days over three seasons The post excavation process for Faxton was beset by delay Of the 12 chapters presented in this monograph only two were substantially complete at the time of the director's death in 2014 The others have had to be pieced together from interim summaries partial manuscripts sound recordings handwritten notes and on site records Building on this evidence a new team of scholars have re considered the findings in order to set the excavations at Faxton into the wider context of modern research Their texts reflect on the settlement's disputed pre Conquest origins probable later re planning and expansion the reasons behind the decline and abandonment of the village the extraordinary story behind the destruction of its church the development of the open fields and the enclosure process as well as new evidence about Faxton's buildings and the finds discovered there Once lauded then forgotten the excavations at Faxton now make a new contribution to our knowledge of medieval life and landscape in the East Midlands

Medieval Bridges of Middle England Marshall G. Hall, 2024-03-15 Throughout history rivers have been a hub for human settlement and have long been a key part of local livelihoods history and culture as well as still playing a present day role in providing services and leisure to people who live around them It is no coincidence that all four of the

earliest human civilizations were formed on great rivers the Nile Euphrates Indus and Yellow rivers all saw great human aggregation along them The most ancient and vital architectural structures linked to the use of rivers are bridges There are a wide range of medieval bridge structures some very simple in their construction to amazing triumphs of design and engineering comparable with the great churches of the period They stand today as proof of the great importance of transport networks in the Middle Ages and of the size and sophistication of the medieval economy These bridges were built in some of the most difficult places across broad flood plains deep tidal waters and steep upland valleys and they withstood all but the most catastrophic floods Yet their beauty from simplistic to ornate remains for us to appreciate Medieval Bridges of Middle England has been organized geographically into tours and covers the governmental regions of East of England East Midlands and West Midlands There are 62 bridges included and beautiful full color photographs of each bridge are included A brief history is incorporated with each bridge Additionally information about the construction materials used and unique features are related as well as historically relevant documents and images Directions to each bridge and local attractions are also given There are literally hundreds of bridges in England that meet the criteria for inclusion in this roll of honor for senior bridges They vary vastly in size style and materials Most are stone and a very few are brick We have lost many of our older bridges to the ravages of time and the modern practice of culvertisation and urban development A few of our older bridges remain though and their beauty and pivotal role in our history is starting to be recognized **The Medieval March of**

Wales Max Lieberman, 2010-01-28 This book examines the making of the March of Wales and the crucial role its lords played in the politics of medieval Britain between the Norman conquest of England of 1066 and the English conquest of Wales in 1283 Max Lieberman argues that the Welsh borders of Shropshire which were first from c 1165 referred to as Marchia Wallie provide a paradigm for the creation of the March He reassesses the role of William the Conqueror's tenurial settlement in the making of the March and sheds new light on the ways in which seigneurial administrations worked in a cross cultural context Finally he explains why from c 1300 the March of Wales included the conquest territories in south Wales as well as the highly autonomous border lordships This book makes a significant and original contribution to frontier studies investigating both the creation and the changing perception of a medieval borderland Historians D. Snowman, 2006-11-10 History in all its forms is more popular nowadays than ever History programmes on television can attract audiences in the millions as do top heritage sites while growing numbers of people pursue family and local history and join historical re enactment societies A bestselling history book can nowadays outsell a popular novel something almost unimaginable fifty years ago Who are the men and women who have helped make the past of such absorbing interest to the present and how have they done so In his stimulating anthology of essays about the life and work of some of our leading historians Daniel Snowman provides a vivid snapshot of history and historians in our new century Included in Historians are Jeremy Black John Brewer Asa Briggs Peter Burke David Cannadine Linda Colley Norman Davies Natalie Zemon Davis Christopher Dyer Richard J Evans Niall Ferguson
