Violence in Nigeria Patricia Taft, Nate Haken, 2015-03-03 This book takes a quantitative look at ICT generated event data to highlight current trends and issues in Nigeria at the local state and national levels Without emphasizing a specific policy or agenda it provides context and perspective on the relative spatial temporal distribution of conflict factors in Nigeria The analysis of violence at state and local levels reveals a fractal pattern of overlapping ecosystems of conflict risk that must be understood for effective conflict sensitive approaches to development and direct conflict mitigation efforts Moving beyond analyses that use a broad religious ethnic or historical lens this book focuses on the country's 774 local government areas and incorporates over 10 000 incidents coded by location date and indicator to identify patterns in conflict risk between 2009 and 2013 It is the first book to track conflict in Nigeria during this period which covers the Amnesty Agreement in the Niger Delta and the birth of Boko Haram in the North It also includes conflict risk heat maps of each state and trend lines of violence The authors conclude with a discussion of the nuanced factors that lead to escalating violence such as resource competition and trends in terrorism during this critical point in Nigeria's history Violence in Nigeria is designed as a reference for researchers and practitioners working in security peacebuilding and development including policy makers intelligence experts diplomats national defense and homeland security experts Advanced level students studying public policy international relations or computer science will also find this book useful as a secondary textbook or reference

trajectory of struggles in the Niger Delta since 1995 paying attention to continuities and changes including recent developments linked to the shift from local resistance to the rupturing of the Presidential Amnesty peace deal largely to the Movement for the Emancipation of the Niger Delta and the resurgence low intensity sporadic armed militancy led by the Niger Delta Avengers militia among others The contributors critically interrogate the nature of the region s political economy socio economic trends and trajectories over the past two decades This collection also accentuates the lessons learnt prospects for self determination socio economic and environmental justice and peace in the aftermath of the hanging

Violence in Nigeria Marc-Antoine Pérouse de Montclos, 2016 Most of the academic literature on violence in Nigeria is qualitative It rarely relies on quantitative data because police crime statistics are not reliable or not available or not even published Moreover the training of Nigerian social scientists often focuses on qualitative cultural and political issues There is thus a need to bridge the qualitative and quantitative approaches of conflict studies This book represents an innovation and fills a gap in this regard It is the first to introduce a discussion on such issues in a coherent manner relying on a database that fills the lacunae in data from the security forces The authors underline the necessity of a trend analysis to decipher the patterns and the complexity of violence in very different fields from oil production to cattle breeding radical Islam to motor accidents land conflicts to witchcraft and so on In addition they argue for empirical investigation and a complementary approach using both qualitative and quantitative data The book is therefore organized into two parts with a focus first on statistical studies then on fieldwork

Forest, Joint Special Operations University (U.S.), 2014-10-30 Assesses the threat Boko Haram poses to Nigeria and U S national security interests Boko Haram is largely a local phenomenon though one with strategic implications and must be understood and addressed within its local context and the long standing grievances that motivate terrorist activity To meet the security challenges posed by Boko Haram and others the author advocates the use of intelligence led policing and trust building between the government and citizenry Nongovernmental organizations and community actors which have legitimacy based on tribal or ethnic affiliations should also play a key role in a broad spectrum

approach that addresses both the terrorist threat of Boko Haram and the root grievances of the communities in which they operate

Boko Haram Ona Ekhomu, 2019 Boko Haram analyzes the activities and atrocities of Nigeria's Jihadi terrorist group Boko Haram in the context of global religious fundamentalism and extremism. The book traces the early beginnings of the religious sect, the conversion of its leader to radical Islam in 2002 and the group's campaign of violence beginning in 2009 and continuing to the present. The group's attacks against a variety of targets are examined in detail as are their general tactics and strategies. The Nigerian government response is also examined in order to provide critical lessons to counterterrorism planners, policy and government officials and scholars. The initial military response was hampered by capability and legislative constraints including lack of arms and ammunition, lack of modern counterterrorism equipment, training gaps, leadership issues, intelligence gap, politicization of the conflict and limited support to the Nigerian Military by the international community. Boko Haram looks at the work that has been done thus far and what work needs to continue to make gains to combat, marginalize and ultimately defeat Boko Haram and resolve the conflict facing Nigeria.
