Being No One Thomas Metzinger,2004-08-20 According to Thomas Metzinger no such things as selves exist in the world nobody ever had or was a self All that exists are phenomenal selves as they appear in conscious experience The phenomenal self however is not a thing but an ongoing process it is the content of a transparent self model In *Being No One* Metzinger a German philosopher draws strongly on neuroscientific research to present a representationalist and functional analysis of what a consciously experienced first person perspective actually is Building a bridge between the humanities and the empirical sciences of the mind he develops new conceptual toolkits and metaphors uses case studies of unusual states of mind such as agnosia neglect blindsight and hallucinations and offers new sets of multilevel constraints for the concept of consciousness Metzinger s central question is How exactly does strong consciously experienced subjectivity emerge out of objective events in the natural world His epistemic goal is to determine whether conscious experience in particular the experience of being someone that results from the emergence of a phenomenal self can be analyzed on subpersonal levels of description He also asks if and how our Cartesian intuitions that subjective experiences as such can never be reductively explained are themselves ultimately rooted in the deeper representational structure of our conscious minds
