History of Arbovirology: Memories from the Field Nikos Vasilakis, Laura D. Kramer, 2023-07-29 These books bring together a panel of expert arbovirologists who recall the history of arbovirology from very personal perspectives In these timely volumes the authors describe seminal moments in their experiences in the field and how they integrated these findings with lab studies to further clarify the ecology and epidemiology of diverse arboviruses Authors identify the most pressing questions that remain to be answered providing a basis for current research and a stimulus to engage those entering the field Over the last 20 years a generational gap has developed between the giants of arbovirus research and discovery and the new generation This gap developed due to an ebbing of training and investment in passing the scepter to the next generation leading to a lack of continuity among the generations that threatens to derail the rich history of virus discovery field epidemiology and understanding of the richness of diversity that surrounds us This lack of continuity may have immediate and disastrous consequences for public health

when yet to be discovered arboviruses emerge The purpose of these books is to bridge this gap by providing a historical context for the work being done today and provide continuity between the generations To this end the books provide a narrative of the thrill of scientific discovery and excitement of field adventures and lab studies of that generation essential reading for every arbovirologist and highly recommended for all virologists and public health officials as well as those students considering future research options Volume I consists of the personal reflections of arbovirologists who played a significant role in the advancement of arbovirology across the globe Volume II transitions to descriptions of region specific and virus family specific perspectives of arbovirology as well as recollections of the early events of molecular advances and pathogenesis studies *Leukemia in Animals and Man* H.
