Visible Women Tales Of Age Gender And Invisibility:

Visible Women Christine Bell, 2012-01-17 *Visible Women Tales of Age Gender and Invisibility* is a reflective questioning subjective self indulgent and moving narrative exploration of the experiences of women growing older and not disappearing What lies behind stories of older women becoming invisible and disregarded How true are they where do they come from and what do they mean How might they be challenged and what other stories can be told The core of the book is the poetic representation of the thoughts and lives of a group of women between 50 and 70 Their narratives are drawn from the email correspondence between the author and her seven co researchers Starting with a search for the anecdotal and mythical invisible woman the author's own story is woven into and becomes part of the journey The landscape which is beautifully observed in clear non academic language takes us through feminist and poststructuralist theory existentialism autobiography journalism fictional writing art film poetry and the internet In examining the bones of tales of invisibility Christine Bell is motivated by indignation as much as curiosity

Welcoming Children Joyce Ann Mercer, 2005-11-01 This book develops a theology of childhood both from a theoretical basis in biblical theology especially the gospel of Mark and practical experience in children and youth ministry Mercer builds on classical theologians such as Augustine Calvin Barth and Rahner as well as modern feminist theologians such as Brock and Russell She gains insights from pastoral theologians such as Capps and Couture and from contemporary cultural criticism Mercer challenges approaches to educational and liturgical practices with children in congregations that segregate children from the rest of the church and its key practices of service mission worship care and learning She reframes ministries with children as processes through which the church as a community of practice

forms children into an alternative identity that resists surrounding consumerist culture and walks in the ways of Jesus This book offers strategies for educational practices with children in congregations as it seeks to address the question What might educational practices that welcome children and contribute to their flourishing look like in the context of a faith community where children's learning happens in collaboration with experienced practitioners of faith Outlining a feminist practical theology of childhood it explores five basic theological claims 1 children as gifts and parenting as a religious practice of stewardship 2 welcoming those who welcome and care for children 3 children as already fully human 4 children as part of the purposes of God and 5 acknowledging and transforming the sufferings of children

Working-Class Women in Irish Literature and Theatre Clara Mallon, Salomé Paul, 2025-07-25 Working Class Women in Irish Literature and Theatre critically engages with works of theatre both by and about working class women historically and presently Addressing professional and community theatre productions from both textual and performative perspectives this volume focuses on works of theatre by practitioners directors playwrights and performance artists across rural and urban contexts Irish theatre has a long history of signifying social class Yet the representations of working class women in Irish theatrical history also encompass several problematic issues starting with the fact that these depictions were created by male writers like J M Synge and Seán O'Casey to name but a few Nonetheless the theatre's emphasis on embodied performance and its ability to reach its public in an unmediated way has attracted working class engagement perhaps more than other art forms in Ireland Contemporary playwrights in the Republic and the north of Ireland have tirelessly striven to illuminate working class women's lived experiences and have reframed the characterisation of working class women by drawing out the intersection of social class with sexualities ethnic minorities and racial identities This edited collection also includes the voices of directors playwrights and performers who identify with a working class social background offering first hand accounts of their lived experience in the theatre industry

The Gendered Society Michael S. Kimmel, 2007 Thoroughly updated and revised the third edition of *The Gendered Society* explores current thinking about gender both inside academia and in our everyday lives Michael S Kimmel challenges the claim that gender is limited to women's experiences his compelling and balanced study of gender includes both masculine and feminine perspectives Part 1 examines the latest work in biology anthropology psychology and sociology Part 2 provides an original analysis of the gendered worlds of family education and work and Part 3 explores gender interactions including friendship and love sexuality and violence Kimmel makes three bold and persuasive statements about gender First he demonstrates that gender differences are often extremely exaggerated in fact he argues that men and women have much more in common than we think they do Kimmel also challenges the pop psychologists who suggest that gender difference is the cause of inequality between the sexes instead he reveals that the reverse is true gender inequality itself is the cause of the differences between men and women Finally he illustrates that gender is not merely an element of individual identity but a socially constructed institutional phenomenon A new chapter on media examines the

portrayal of gender in one of the most powerful and provocative social institutions Of particular interest to students Kimmel's analysis of this dynamic image driven industry makes the study of gender relevant in an immediate and tangible way Essential reading for both students and scholars The Gendered Society is an authoritative incisive and lively statement about contemporary gender relations from one of the country's foremost thinkers on the subject Kimmel's companion text The Gendered Society Reader Third Edition OUP 2008 provides a perfect complement for classroom use

Demons of the Body and Mind Ruth Bienstock Anolik, 2014-01-10 The Gothic mode typically preoccupied by questions of difference and otherness consistently imagines the Other as a source of grotesque horror The sixteen critical essays in this collection examine the ways in which those suffering from mental and physical ailments are refigured as Other and how they are imagined to be monstrous Together the essays highlight the Gothic inclination to represent all ailments as visibly monstrous even those such as mental illness which were invisible Paradoxically the Other also becomes a pitiful figure often evoking empathy This exploration of illness and disability represents a strong addition to Gothic studies

Invisible People and Processes Jenny Moore, Eleanor Scott, 1997 Invisible People and Processes focuses on issues of gender and childhood in European archaeology It presents a range of themes and periods covering Britain the Mediterranean and Eastern Europe with contributions by scholars from the UK USA Canada and Europe The authors not only examine the archaeological record for these two structuring principles of human society but also consider cultural variability and discuss related theoretical problems The structure of the book is thematic The first part concentrates on theory and reviews the available evidence The second part includes case studies of critical research relating particularly to gender while the last part contains case studies relating especially to children and childhood Each part is concluded by a commentary from an expert in the field This book is the first archaeological work on gender to focus exclusively on the European archaeological record and to combine this with a coherent discussion of childhood and concepts of childhood It will be essential reading for all those working in gender and related studies especially in an archaeological context

Handbook of Gender Research in Psychology Joan C. Chrisler, Donald R. McCreary, 2010-03-12 Donald R McCreary and Joan C Chrisler The Development of Gender Studies in Psychology Studies of sex differences are as old as the eld of psychology and they have been conducted in every sub eld of the discipline There are probably many reasons for the popularity of these studies but three reasons seem to be most prominent First social psychological studies of person perception show that sex is especially salient in social groups It is the rst thing people notice about others and it is one of the things we remember best Fiske Haslam Stangor Lynch Duan Glass 1992 For example people may not remember who uttered a witty remark but they are likely to remember whether the quip came from a woman or a man Second many people hold rm beliefs that aspects of physiology suit men and women for particular social roles Men's greater upper body strength makes them better candidates for manual labor and their greater height gives the impression that they would make good leaders i e people we look up to Women's reproductive capacity and

the caretaking tasks e.g. breastfeeding, baby minding that accompany it make them seem suitable for other roles that require gentleness and nurturance. Third, the logic that underlies hypothesis testing in the sciences is focused on difference. Researchers design their studies with the hope that they can reject the null hypothesis that experimental groups do not differ.

Invisible Women in Transitional Times Debra Pozega Osburn, 2001 **Older Women in Europe** Isabella Paoletti, 2022-09-30 This book is about older women's strength, freedom, tenacity, determination, resilience, independence, social and political involvement, and in particular, it is about reimagining ageing. Older women represent the great majority of older people. The book describes instances of age and gender discrimination and examples of social inclusion and protagonism of older women in Europe. It solicits a change in perspective, focusing on the necessary societal changes to make space to older people and older women in particular. How is society going to address age and gender discrimination in social and institutional settings? How should work settings change to effectively make space to older workers and in particular older women? How should the pension system change? How could public health systems provide effective care to older people and be sustainable? This edited collection focuses on older women's rights rather than their needs, adopting a human rights-based approach. Preservation of older women's dignity, autonomy, and security is its central topic, that is, ensuring that their rights are recognised. This collection offers insights valuable to a wide array of human rights activists, professionals, policymakers, and social scientists, and older women themselves.

The Psychology of Prejudice and Discrimination: Disability, religion, physique, and other traits Jean Lau Chin, 2004 Examine the state of prejudice and discrimination in America today and each offers practical direction that can be taken by individuals, communities, and officials to create a more just society. Each chapter offers a toolbox of information on how to cope, how to keep oneself whole, how to seek validation of identity, how to raise children to dispel unfair images and perceptions, and how to work for societal change.

The Invisible Diggers Paul Everill, 2009 Since the increasing reliance on developers to fund archaeological work through the 1980s and the implementation of Planning Policy Guidance Note 16 (PPG16) in 1990, British commercial archaeologists have become increasingly distanced from their academic colleagues. This monograph examines the situation within contemporary commercial archaeology and considers the challenges faced by those employed within that sector, including the impact of commercial working practices on pay and conditions of employment and the process of excavation and knowledge production. This monograph provides a fascinating insight into the working environment of commercial archaeologists and demonstrates how camaraderie and love of their job is often just enough to outweigh the adversity they face in the form of low wages, poor employment conditions, and career prospects.

Women's Studies in Communication, 1993 **The Invisible Majority**, 1990 **Invisible Barriers** Marion den Uyl, 1995 In Kerala in Southern India, the caste system has been legally abolished, but untouchability lives on. Campaigns fought in recent years for social equality resulted in land reforms and new labour laws. The relationships between castes and between land owners and landless labourers changed, and so too did unintentionally the

relations between men and women As women lost many of their rights their standing in society diminished considerably In this book the stories told by outcaste women in a village in southern Kerala describe the extent of these changes Anthropologist Marion den Uyl was able to record these stories in the best tradition of oral anthropology The women describe how they see their lives their circumstances and their future The research distinguishes itself from the viricentrist approach characterizing most anthropological research Invisible Barriers is not about power and powerlessness nor is it solely about the economic position of women typically subjects of masculine research Marion den Uyl has an eye for the softer powers shaping the lives of women sexuality motherhood and self image For students and researchers of gender poverty women cultural anthropology and Asian politics **Journal of Applied Rehabilitation Counseling** ,1992
