Short-Range Optical Wireless Mohsen Kavehrad, M. I. Sakib Chowdhury, Zhou Zhou, 2016-01-19. This book discusses the fundamental aspects of multiple source Optical Wireless Applications including Visible Light Communications (VLC). Moreover, the authors explore VLC performance in several conventional household layouts and investigate the impact of these layouts on VLC. Multiple sources increase multipath distortion. Multi-input Multi-Output (MIMO) techniques will be included as they provide either reliability improvement or bandwidth efficiency increase. Based on these topics, the book further explores VLC performance in real applications such as aircraft cabin wireless communications. In addition, the authors

describe the Lambertian emitting pattern of LEDs and the diffused features in indoor environments Based on the theory they trace light pulses to establish a MIMO indoor wireless channel model on specific sources layout Next they generate test data to simulate BER distribution in a room and calculate the outage Furthermore addresses the performance improvement when MIMO techniques are applied Lastly the authors investigate VLC performance in specific applications including for aircraft on board wireless communications Finally the pitfalls of MIMO systems are discussed People and Space Giovanni

Maciocco, Silvano Tagliagambe, 2009-04-05 This book explores new forms and modalities of relations between people and space that increasingly affect the life of the city The investigation takes as its starting point the idea that in contemporary societies the loss of our relationship with place is a symptom of a breakdown in the relationship between ethics and aesthetics This in turn has caused a crisis not only in taste but also in our sense of beauty our aesthetic instinct and our moral values It has also led to the loss of our engagement with the landscape which is essential for cities to function The authors argue that new fertile forms of interaction between people and space are now happening in what they call the intermediate space at the border of urban normality and those parts of a city where citizens experiment with unconventional social practices This new interaction engenders a collective conscience giving a new and productive vigor to the actions of individuals and also their relations with their environment These new relations emerge only after we abandon what is called the therapeutic illusion of space which still exists today and which binds in a deterministic manner the quality of civitas the associative life of people in the city to the quality of urban space Projects for the city should instead have as their keystone the notion of social action as a return to a critical perspective to a courageous acceptance of social responsibility at the same time as seeking the generative structures of urban life in which civitas and urbs again acknowledge each other Cognitive
