Visionary Clients For New Architecture

Jeffrey A. Hess, Paul Clifford Larson

Visionary Clients For New Architecture:

Visionary Clients for New Architecture Joseph Rykwert, 2000 Clients of architects are featured in this volume which sheds light on the tricky balance of power between the architect and the client It focuses on three visionaries who commissioned buildings which became 20th century architectural icons Design through Dialogue Karen A. Franck, Teresa von Sommaruga Howard, 2010-02-15 Completed projects receive more public attention than the process of their creation and so the myth that architects design buildings alone lives on In fact architects work with a great many others and the relationships that develop particularly with clients have a significant impact on design Design through Dialogue explores the relationship between client and architect through the lens of four overlapping activities that occur during any project relating talking exploring and transforming Cases of design and collaboration range from smaller scale retail residential and educational projects in the US Sweden the UK and the Pacific Rim to large institutions including Seattle's Central Library the National Museum of the American Indian in Washington DC the Supreme Court in Jerusalem and the Museum of New Zealand Material is taken from interviews with clients and architects and research in psychotherapy group dynamics and design studies Throughout the book aspects of process are linked to design outcomes to illustrate how architects and clients collaborate creatively **Architecture** Geoffrey Makstutis, 2010-02-12 This book offers a thorough introduction to the entire field of architecture outlining the steps that are normally taken in becoming a qualified architect from initial education right through to professional practice as well as how to apply this architectural training in other fields Complete with feature spreads on individual projects Architecture An Introduction's broad up to date approach unites history theory and practice Subjects covered include how to develop a brief with a client taking an idea from brief to project types of visual presentation including drawings models and computer renderings project planning and management the diverse roles within a company and the future of architectural practice This book is a must for anyone considering taking an architecture course or just beginning one **Body and Building** George Dodds, Robert Tavernor, Joseph Rykwert, 2002 Essays on the changing relationship of the human body and architecture *Confronting Universalities* Mads Anders Baggesgaard, Jakob Ladegaard, 2011-07-15 The universe is expanding the world has gone global and the US has launched a crusade to export the universal right to democracy to every part of the world Under the circumstances it is hardly surprising that the concept of universality is making a remarkable comeback in aesthetic and political theory The meaning of the world however seems more contested than ever Some denounce it as the ideological guise of particular interests others as the conceptual equivalent of totalitarianism But a growing number maintain that universality is an indispensable notion for any genuinely critical aesthetics and politics Confronting Universalities consists of 12 contributors that examine how contemporary works of art in different media and genres influence shape or confront the political realm in both theory and practice by way of the universal The topics of the essays include depictions of German unification identity politics of aesthetic taste contemporary

uses of van Gogh globalized photography the infamous Danish cartoons iconic architecture cinematic representations of migration the speeches of Nicolas Sarkozy and the interventions of contemporary art in the war in Afghanistan From various theoretical points of departure they all demonstrate the importance of the universal in the description of political aesthetic practice in a globalising world *Leading with Aesthetics* Mahesh Daas,2015-07-16 *Leading with Aesthetics* The Transformational Leadership of Charles M Vest at MIT examines the role of aesthetics design and architecture in organizational transformation and leadership particularly in the context of academic institutions Leadership has been thus far predominantly examined from the perspective of function performance and position in the organizational structure such as a CEO or a president Relatively little work has been done in studying leadership of academic institutions let alone from the perspective of aesthetics both of which this book aims to rectify Although aesthetic dimension is important in any organizational context it is particularly important for academic institutions *Leading with aesthetics* would empower leaders in any organizational setting Daas examines the aesthetic dimension of transformational leadership through an eclectic blend of lenses drawn from the fields of architecture political science organizational aesthetics and organizational psychoanalysis A detailed case study of the leadership of Charles Marsteller Vest 1941 2013 who served as the president of Massachusetts Institute of Technology for fourteen years between 1990 and 2004 illustrates the importance of the aesthetic dimension in leadership and organizational change *The New Alchemists* Charles Handy,Elizabeth Handy,2011-02-28 The world needs new ideas now products new kinds of associations and institutions new initiatives new art and new designs But these new things seldom come from established organisations They come from individuals the New Alchemists What drives people to create something from nothing Is it ambition the need for self fulfilment Is it to do with money power or even genes Is there a mood of the time that encourages people Can anyone do it Charles Handy has talked to a range of extraordinary characters from Trevor Baylis and Richard Branson to Jane Tewson and Terence Conran And Elizabeth Handy has used her new style of composite portraits to highlight aspects of all the different alchemists in their particular environments *The New Alchemists* is a fascinating and inspirational investigation into the creative and entrepreneurial process **Whose Muse?** James Cuno,2018-06-05 During the economic boom of the 1990s art museums expanded dramatically in size scope and ambition They came to be seen as new civic centers on the one hand as places of entertainment leisure and commerce on the other as socially therapeutic institutions But museums were also criticized for everything from elitism to looting or illegally exporting works from other countries to exhibiting works offensive to the public taste *Whose Muse* brings together five directors of leading American and British art museums who together offer a forward looking alternative to such prevailing views While their approaches differ certain themes recur As museums have become increasingly complex and costly to manage and as government support has waned the temptation is great to follow policies driven not by a mission but by the market However the directors concur that public trust can be upheld only if museums continue to see their core mission as building

collections that reflect a nation's artistic legacy and providing informed and unfettered access to them The book based on a lecture series of the same title held in 2000 2001 by the Harvard Program for Art Museum Directors also includes an introduction by Cuno and a fascinating and surprisingly frank roundtable discussion among the participating directors A rare collection of sustained reflections by prominent museum directors on the current state of affairs in their profession this book is without equal It will be read widely not only by museum professionals trustees critics and scholars but also by the art loving public itself *Art/Museums* Christine Sylvester,2015-12-03 *Art Museums* takes the study of international relations to the art museum It seeks to persuade those who study international relations to take art museums seriously and museum studies to take up the insights of international relations And it does so at a time when both international relations and art are said to be at an end that is out of control and beyond sight of their usual constituencies The book focuses on the British Museum the National Gallery of London the Museum of Iraq the Museum of Modern Art in New York the Getty museums the Guggenheim museums and museum spaces instantly created by the attacks on the World Trade Center in 2001 The art includes works over which museums might struggle acquire through questionable means hoard and possibly lose such as the Parthenon sculptures Raphael's Madonna of the Pinks the ancient art of Babylon modern art and the art museum itself in an era of rapid museum expansion Bringing art museums and international relations together draws on the art technique of collage which combines disparate objects themes and time periods in one work to juxtapose unexpected elements leaving the viewer to relate objects that are not where they are expected to be **Contemporary Authors New Revision Series**
