The Bullet that Backfired on British Leyland

Codenamed Bullet was British Leyland's audacious bid to conquer the North American sports car market, in order to earn the vital export dollars needed to re-invest in their ageing model range. Undeterred by draconian US safety and emission regulations, they stepped boldly forward as European manufacturers retreated. BL was blighted by poor industrial relations, lack of investment and economic crises that devastated British industry. The purpose-built Triumph factory at Speke was closed three years after the TR7 launch and production moved twice before cancellation in 1981. A similar project in Japan created the Datsun 240z, demonstrating how an opportunity had been squandered, but British Leyland's launch of an under developed car administered a fatal blow to the company's battered reputation, increasing reliance on government aid and accelerated a cycle of terminal decline.

Tr7 Steve Jackson,2015-06-01 Codename Bullet was British Leyland's audacious bid to conquer the North American sports car market in order to earn the vital export dollars needed to re-invest in their ageing model range. Undeterred by draconian US safety and emission regulations they stepped boldly forward as European manufacturers retreated. British Leyland was blighted by poor industrial relations, lack of investment and economic crises that devastated British industry. The purpose-built Triumph factory at Speke was closed three years after the TR7 launch and production moved twice before cancellation in 1981. The Illustrated History of Triumph Sports and Racing Cars G. William Krause,2017-11-15 The Triumph Motor Company is known around the world for its iconic sports cars. The hugely popular TR series Spitfires and GT 6s represent the quintessential British sports car: rugged good looks were combined with performance and economy at a price everyone could afford. These sports cars are always in demand and prized by British car collectors, racers and open air motoring enthusiasts. Triumph understood the connection between competition success and sales success and was able to parlay rally and road racing wins into the best-selling sports cars in the world, particularly in the United States during the 1950s and 1960s. The Works competition cars notched victories at Le Mans, Sebring, the Monte Carlo rally and many others, and inspired privateers to take their cars to the track. Every model came from a bloodline of racing. Triumph historian G. William Krause reviews every model in the sports car lineup. He covers the history, design, evolution and performance specifications from the first sports cars in the 1930s through the final cars built in 1981. Throughout Triumph's history, a number of pivotal moments could have significantly changed the company's fortunes. This book also looks at the what-if cars that never made it into production, including photos. Although they have not been built for more than three decades, their mark on sports car history is undeniable. Whether you're a fan of the spartan brutes of the 1950s or the refined comfort and performance of the last TRs, you will find the backstory of your favorites here.
