The second edition of this book achieved worldwide recognition within the chocolate and confectionery industry I was pressed to prepare the third edition to include modern developments in machinery production and packaging This has been a formidable task and has taken longer than anticipated Students still require in one book descriptions of the fundamental principles of the industry as well as an insight into modern methods Therefore parts of the previous edition describing basic technology have been retained with minor alterations where necessary With over fifty years experience in the industry and the past eighteen years working as an author lecturer and consultant I have collected a great deal of useful information Visits to trade exhibitions and to manufacturers of raw materials and machinery in many parts of the world have been very valuable Much research and reading have been necessary to prepare for teaching and lecturing at various colleges seminars and manufacturing establishments The third edition is still mainly concerned with science technology and production It is not a book of formulations which are readily available elsewhere Formulations without knowledge of principles lead to many errors and recipes are given only where examples are necessary \_ Analytical methods are described only when they are not available in textbooks of which there are many on standard methods of food analysis Acknowledgments I am still indebted to many of the persons mentioned under Acknowledgments in the second edition I am especially grateful to the following      *Training Manual for the Dictionary of Occupational Titles* United States Employment Service,1965      **The Ultimate Service Dog Training Manual** Keagen J.
