Keener,1995 This book is written for beginning graduate students in applied mathematics science and engineering and is appropriate as a one year course in applied mathematical techniques although I have never been able to cover all of this material in one year We assume that the students have studied at an introductory undergraduate level material on linear algebra ordinary and partial differential equations and complex variables The emphasis of the book is a working systematic understanding of classical techniques in a modern context Along the way students are exposed to models from a variety of disciplines It is hoped that this course will prepare students for further study of modern techniques and in depth modeling in their own specific discipline Drying Eastern Hardwood Lumber John M.
