Solving Two-Step Problems

GRADE 3

Solving any math problem is not only accountable with one step or process, it may have a different procedure to arrive with the same answer. Two-step process is one way of solving a math problem in two equation, which can be in the means of addition, subtraction, multiplication and / or division.

I had 12 chips. I gave my friend 2 of them. Then I bought another 4. How many chips do I have in all?

Solving Two-Step Problems

First step: Subtract the total number of chips to the first given scenario.
($12 - 2 = 10$)

Second step: Add the answer obtained from the first step to the second scenario. ($10 + 4 = 14$) : So, the girl has 14 chips in total.
