(II) Pre-lab Report Guideline

- (i) Title of the experiment
- (ii) Reference (i.e. complete reference of the experiment including title of the lab manual, author, edition and page number of the experiment in the manual etc.) Include any changes to the procedure that you know you will make.
- (iii) Short introduction (Summarize in a few sentences about the background and the goal of the experiment. Outline the kinds of technique that you will use in the experiment)
- (iv) Procedures (flowchart format)
- (v) Pre-lab study questions (MUST show ALL your work)
(complete ONLY# 1, 2, 4, 5 & 6 on page 4 of the handouts)

Note: For question 2, you may assume that for EACH dilution process, each piece of equipment can ONLY be used once and you can also assume that no combinations are allowed for the same kind of equipment (i.e. you don't need to worry about using the combination of a 10-mL and a 5-mL pipet in a single dilution process).

Note: The on-line resources listed above may be useful when working on the study questions.
