The UFO Cover-up Lawrence Fawcett,1990-01-01 Using recently declassified government files the authors present a compelling argument that the government knows a great deal more about UFOs than it has shared with the public and has in fact deliberately concealed the findings of more than 30 years of investigations Photographs **UFO Cover-up Bill** Fawcett, Lawrence Fawcett, Barry J. Greenwood,1990-07 Using recently declassified government files the authors present a compelling argument that the government knows a great deal more about UFOs than it has shared with the public and has in fact deliberately concealed the findings of more than 30 years of investigations Photographs Liberty Means Freedom for All Steven H. Propp,2012-11-16 Thomas Anderson has just graduated from CSU Stentoria with his degree in Political Science Its an election year and as a young progressive in California who has been raised by equally progressive parents he is very much concerned with the political issues currently being discussed in the mass media A chance encounter with a fellow graduate named Kelly Kelso however shakes up his settled view of the world He is challenged to examine the rising number of alternatives to the two party system presented by third party movements such as the Libertarian Party and the Green Party and is forced to acknowledge that there is far more to politics than simply Democrat versus Republican and liberal versus conservative Thomas delves energetically into not only the growing Libertarian movement but the free market perspective of the Austrian School of economics as well as the rigid yet compelling view of Ayn Rands philosophy of Objectivism His explorations grow wider now encompassing the Tea Party movement and the Christian Right tax resisters and gun rights advocates survivalists and militia members anarchists communists and Democratic Socialists as well as the Occupy Wall Street movement He debates the radical environmental views of animal welfare and animal rights advocates and challenges opponents of corporate globalism as well as deniers of global warming as he struggles to reformulate and articulate his own developing beliefs while coping with a sea of conflicting ideas and opposition But this abstract political theory is brought into sharp encounter with concrete political reality when Thomas hears a news report of an armed conflict with authorities taking place just outside of town involving someone with whom he has become emotionally involved *Face To Face With The Unknown* Sherry Hansen Steiger,2001-04-15 The line that divides fiction from fact is not always as clear as it may seem Two plus two equals four right But what if just once two plus two equaled five Hard to believe Absolutely But for the young people whose stories are related here that is exactly what happened Each of them experiences something that simply could not be explained For instance two boys forced to spend the night in their car during a bad storm learn the next morning that an eyewitness swears he saw four burly men inside their car scare off a gang But who were the men The boys were alone that night Another time a teen on the way home from a date comes upon strange alien forms in the road ahead He chases after them only to discover humanoid imprints in the grass Not even the local sheriff can explain it Mysterious sightings alien encounters guardian angels ghostly hauntings bizarre visitations In dozens of stories teens relate real life

This is a comprehensive account of the religious dimensions of the UFO flying saucer experience **Islam, Science Fiction and Extraterrestrial Life** Jörg Matthias Determann, 2020-09-17 The Muslim world is not commonly associated with science fiction Religion and repression have often been blamed for a perceived lack of creativity imagination and future oriented thought However even the most authoritarian Muslim majority countries have produced highly imaginative accounts on one of the frontiers of knowledge astrobiology or the study of life in the universe This book argues that the Islamic tradition has been generally supportive of conceptions of extra terrestrial life and in this engaging account Jörg Matthias Determann provides a survey of Arabic Bengali Malay Persian Turkish and Urdu texts and films to show how scientists and artists in and from Muslim majority countries have been at the forefront of the exciting search Determann takes us to little known

dimensions of Muslim culture and religion such as wildly popular adaptations of Star Wars and mysterious movements centred on UFOs Repression is shown to have helped science fiction more than hurt it with censorship encouraging authors to disguise criticism of contemporary politics by setting plots in future times and on distant planets The book will be insightful for anyone looking to explore the science culture and politics of the Muslim world and asks what the discovery of extra terrestrial life would mean for one of the greatest faiths *UFOs Over South Carolina* Sherman

O'Neill,2003 Explores both sides of the question of whether or not spaceships have visited Earth looking at issues related to sightings validity of evidence government conspiracies and media hype **Riveted** Jim Davies,2014-08-05 Why do some

things pass under the radar of our attention but other things capture our interest Why do some religions catch on and others fade away What makes a story a movie or a book riveting Why do some people keep watching the news even though it makes them anxious The past 20 years have seen a remarkable flourishing of scientific research into exactly these kinds of questions Professor Jim Davies fascinating and highly accessible book Riveted reveals the evolutionary underpinnings of why we find things compelling from art to religion and from sports to superstition Compelling things fit our minds like keys in the ignition turning us on and keeping us running and yet we are often unaware of what makes these keys fit What we like and don t like is almost always determined by subconscious forces and when we try to consciously predict our own preferences we re often wrong In one study of speed dating people were asked what kinds of partners they found attractive When the results came back the participants answers before the exercise had no correlation with who they actually found attractive in person We are beginning to understand just how much the brain makes our decisions for us we are rewarded with a rush of pleasure when we detect patterns as the brain thinks we ve discovered something significant the mind urges us to linger on the news channel or rubberneck an accident in case it might pick up important survival information it even pushes us to pick up People magazine in order to find out about changes in the social structure Drawing on work from philosophy anthropology religious studies psychology economics computer science and biology Davies offers a comprehensive explanation to show that in spite of the differences between the many things that we find compelling they have similar effects on our minds and brains
