Understanding Faculty Productivity Standards And Benchmarks For Colleges And Universities:

Understanding Faculty Productivity Michael F. Middaugh, 2001-05-08 An invaluable resource for any college and university striving to meet the National Cost Commission's call to make what colleges do and what it costs more transparent to the public. Jacqueline E. King, director, federal policy analysis, American Council on Education. Defining and measuring faculty productivity are among the most central issues for quality and accountability in higher education. Known for assembling some of the most authoritative research on faculty productivity and for analyzing its impact on academic and institutional accountability, Michael F. Middaugh presents this comprehensive volume to help campus professionals build greater accountability for students, parents, foundations, governmental organizations, and other concerned constituents. Middaugh first draws from a research study funded by TIAA CREF's Cooperative Research Grant Program and the Fund for Postsecondary Education within the U.S. Department of Education. He then provides a new framework for analyzing faculty efficiency and emphasizes how the results of faculty work can become the best indicators of productivity. He also applies the joint study findings to the task of developing benchmarks for faculty productivity. Practitioners from any type of campus will find a rich array of data, valuable recommendations, and relevant examples.

Higher Education: Handbook of Theory and Research John C. Smart, 2010-04-28 Published annually since 1985, the Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities. Each chapter provides a comprehensive review of research findings on a selected topic, critiques the research literature in terms of its conceptual and methodological rigor, and sets forth an agenda for future research intended to advance knowledge on the chosen topic. The Handbook focuses on twelve general areas that encompass the salient dimensions of scholarly and policy inquiries undertaken in the international higher education community. The series is fortunate to have attracted annual contributions from distinguished scholars throughout the world.

Resources in Education, 2001-04 **On Becoming a Productive University** James E. Groccia, Judith E. Miller, 2005-03-15 In 1987 the U.S. Congress established the Malcolm Baldrige National Quality Award program to raise awareness about the importance of quality and performance excellence as a competitive edge. Since 1999 the program has outlined criteria for educational institutions to align their mission, values, goals, processes, and resources into a comprehensive long-term systematic improvement effort. The book profiles six unique institutions that have successfully implemented these criteria: the Montfort College of Business at the University of Northern Colorado, National University, New Mexico State University, Carlsbad, Northwest Missouri State University, University of Wisconsin Stout, and Western Wisconsin Technical College. The University of Wisconsin Stout was the first higher education institution to win the Baldrige Award in 2001 and has since worked with educational institutions in 39 states and 25 countries that are interested in implementing quality improvement through the application of the Baldrige criteria. This book will appeal to academic administrators at all levels and at all types of
