Real Estate Bust John Rubino, 2003-09-20 The housing bubble is about to burst Are you ready While the rest of the economy teeters on the edge of recession home sales are booming and home prices are surging Can this continue Not a chance The housing market is hot because Americans apparently convinced that the good times will never end are borrowing record amounts of money to buy ever larger homes And we've learned to treat our existing homes like piggy banks borrowing against our home equity to maintain our lifestyles This boosts the economy but causes us to incur debts that will soon force us to stop spending The result will be a deep recession complete with declining home prices and a collapse in the value of

housing related stocks And that s the optimistic scenario With mortgage corporate and government debt soaring the bursting of the housing bubble might set off a chain reaction that wreaks 1930s style havoc on stocks the dollar and real estate In clear easy to understand terms this book shows how real estate has become the latest in a long line of financial bubbles how the bubble is likely to burst and how you can both protect yourself and make money as the drama unfolds You ll also learn Why all cash is not equally safe Why gold will soar as the dollar falls Which stocks will be casualties of the housing bust and how to profit from their collapse How to ensure against and even profit from a decline in the value of your home Whether you re worried about the value of your home your stock portfolio or your bank account you ll find answers here You can t stop what s coming but you can turn it to your advantage [Subject Guide to Books in Print](#) ,1991 [Books in Print Supplement](#)

Jacobs,2018-08-17 How investment strategies designed to reduce risk can increase risk for everyone and can crash markets and economies Financial crises are often blamed on unforeseeable events the unforgiving nature of capital markets or just plain bad luck Too Smart for Our Own Good argues that these crises are caused by certain alluring investment strategies that promise both high returns and safety of capital In other words the severe and widespread crises we have suffered in recent decades were not perfect storms Instead they were made by us By understanding how and why this is so we may be able to avoid or ameliorate future crises and maybe even anticipate them One of today s leading financial thinkers Bruce I Jacobs examines recent financial crises including the 1987 stock market crash the 1998 collapse of the hedge fund Long Term Capital Management the 2007 2008 credit crisis and the European debt crisis and reveals the common threads that explain these market disruptions In each case investors in search of safety were drawn to novel strategies that were intended to reduce risk but actually magnified it and blew up markets Too Smart for Our Own Good takes a behind the curtain look at The inseparable nature of investment risk and reward and the often counterproductive effects of some popular approaches for reducing risk A trading strategy known as portfolio insurance and the key role it played in the 1987 stock

market crash How option related trading disrupted markets in the decade following the 1987 crash Why the demise of Long Term Capital Management in 1998 wreaked havoc on US stock and bond markets How mortgage backed financial products by shifting risk from one party to another created the credit crisis of 2007 2008 and contributed to the subsequent European debt crisis This broad detailed investigation of financial crises is the most penetrating and objective look at the subject to date In addition Jacobs an industry insider offers invaluable insights into the nature of investment risk and reward and how to manage risk Risk is unavoidable especially in investing and financial markets connect us all Until we accept these facts and manage risk in responsible ways major crises will always be just around the bend Too Smart for Our Own Good is a big step toward smarter investing and a better financial future for everyone **Bulletin of the Atomic Scientists** ,1969-02
