Understanding Literacy Development A Global View:

Understanding Literacy Development Anne McKeough, Linda M. Phillips, Vianne Timmons, Judy Lee Lupart, 2006-04-21
The acquisition and maintenance of literacy is of pressing interest and concern to educators and educational policy makers worldwide. What are the common themes, the common questions, and the unique circumstances and initiatives that spring from this interest and concern? To address these questions, *Understanding Literacy Development: A Global View* brings together leading experts from around the world to explore ways to best provide teaching and learning opportunities tailored to specific educational needs to help all children become better readers. The premise is that current generic one-size-fits-all approaches are inappropriate for many children and can lead to underachievement and failure. The contributors write from a stance that reflects not only their own particular expertise and experience but also sheds light on literacy development across cultures, countries, and circumstances. Taken together, chapters in this volume target a wide and comprehensive set of literacy issues and offer an extensive exploration of the complexities of literacy development, including issues related to early literacy, school instruction, family literacy, adolescent and adult literacy, and teacher development. At a time when education is burdened by increasing economic pressure to do more with less, it is imperative that educators and decision makers at all levels have access to current, broad-ranging and in-depth information and evidence to inform their choices. This volume, compiling critical research on a wide spectrum of literacy concerns, is an invaluable tool for scholars, teacher educators, professionals, and graduate students in the fields of literacy education, early childhood education, educational psychology, educational policy, and related areas. *Understanding Literacy Development*, 2006. *The Routledge International Handbook of Research on Writing*. Rosalind Horowitz, 2023-02-03. This scholarly research Handbook aggregates the broad-ranging interdisciplinary, multidimensional strands of writing research from scholars worldwide and brings them together into a common intellectual space. This is the first such international compilation. Now in its second edition, the Handbook inaugurates a wide scope of international research advancement with attention to writing at all levels of schooling and in all life situations. It provides advanced surveys of scholarship on the histories of world and child writing and literacy, interconnections between writing, reading, and speech, digital writing, writing in communities, writing in the sciences and engineering, writing instruction and assessment, and writing and disability. A section on international measures for assessment of writing is a new addition to this compendium of research. This Handbook serves as a comprehensive resource for scholars, graduate students, and advanced undergraduates in writing studies and rhetoric, composition, creative expression, education, and literacy studies.

What Teachers Need to Know about Reading and Writing Difficulties Peter S. Westwood, Peter Westwood, 2008. Literacy skills are fundamental to all areas of learning in the school curriculum but also have a profound impact on an individual's chances of finding satisfying work in the years beyond school. This book draws on the latest research from around the world to explain some of the causes of literacy problems and gives practical advice on methods to

support students with their own difficulties Details of additional resources and online links are provided to assist teachers who wish to pursue some of the issues in greater depth

Penketh,2017-07-14 Disability is a widespread phenomenon indeed a potentially universal one as life expectancies rise Within the academic world it has relevance for all disciplines yet is often dismissed as a niche market or someone else's domain This collection explores how academic avoidance of disability studies and disability theory is indicative of social prejudice and highlights conversely how the academy can and does engage with disability studies This innovative book brings together work in the humanities and the social sciences and draws on the riches of cultural diversity to challenge institutional and disciplinary avoidance Divided into three parts the first looks at how educational institutions and systems implicitly uphold double standards which can result in negative experiences for staff and students who are disabled The second part explores how disability studies informs and improves a number of academic disciplines from social work to performance arts The final part shows how more diverse cultural engagement offers a way forward for the academy demonstrating ways in which we can make more explicit the interdisciplinary significance of disability studies and by extension disability theory activism experience and culture Disability Avoidance and the Academy Challenging Resistance will interest students and scholars of disability studies education studies and cultural studies

Family Literacy Matters Linda Phillips, Ruth Hayden, Stephen P. Norris, 2006 By following families over three years the authors have convincingly shown the power of a family literacy program to change lives At the broadest level their conclusions will come as little surprise to anyone in the literacy field the children with the greatest need benefited the most and parents with at least high school education could help their children the most The real richness of this volume however lies in the depth of detail The parents involved in the program told the researchers they were generally paying more attention to printed material reading more often and wanted to learn how to improve their literacy They became more sophisticated in gauging their children's literacy skills and more sure of their own abilities to help those children
