Understanding Nonsuicidal Self Injury Origins Assessment And Treatment:

Understanding Nonsuicidal Self-injury Matthew Nock, 2009-01-01 This is one of the first studies to describe the practice of performance psychology. It blends theory and practice by integrating literature reviews with real world applications for a broad range of clients. It provides extensive session transcripts including consultants' thoughts and reactions throughout each session.

The Oxford Handbook of Suicide and Self-Injury Matthew K. Nock, 2014-05-08 Suicide is a perplexing human behavior that remains among the leading causes of death worldwide responsible for more deaths each year than all wars, genocide and homicide combined. Although suicide and other forms of self injury have baffled scholars and clinicians for thousands of years, the past few decades have brought significant leaps in our understanding of these behaviors. This volume provides a comprehensive summary of the most important and exciting advances in our understanding of suicide and self injury and our ability to predict and prevent it. Comprised of a formidable who's who in the field, the handbook covers the full spectrum of topics in suicide and self injury across the lifespan including the classification of different self injurious behaviors, epidemiology, assessment techniques and intervention. Chapters probe relevant issues in our society surrounding suicide including assisted suicide and euthanasia, suicide terrorism, overlap between suicidal behavior and interpersonal violence, ethical considerations for suicide researchers and current knowledge on survivors of suicide. The most comprehensive handbook on suicide and self injury to date, this volume is a must read text for graduate students, fellows, academic and research psychologists and other researchers working in the brain and behavioral sciences.

The Oxford Handbook of Behavioral Emergencies and Crises Phillip M. Kleespies, 2016-08-22 The Oxford Handbook of Behavioral Emergencies and Crises includes the most up to date and valuable research on the evaluation and management of the most challenging patients or clients faced by mental health providers: individuals who are at high risk of suicide, of other directed violence, or of becoming the victims of interpersonal violence. These are cases in which the outcome can be serious injury or death and there can be negative consequences not only for the patient but also for the patient's family and friends, for the assessing or treating clinician, and for the patient's clinic or medical center. Virtually all mental health clinicians with an active caseload will see individuals with such issues. This Handbook is comprised of chapters by leading clinicians, researchers, and scholars in this area of practice. It presents a framework for learning the skills needed for assessing and working competently with such high risk individuals. Chapters draw a distinction between behavioral emergencies and crises and between emergency intervention and crisis intervention. The book examines the inter related aspects of the major behavioral emergencies that is, for example, the degree to which interpersonal victimization may lead an individual on a pathway to later suicidal or violent behavior, or the degree to which suicidal individuals and violent individuals may share certain cognitive characteristics. This resource is not simply a knowledge base for behavioral emergencies; it also presents a method for reducing stress and acquiring skills in working with high risk people. *Encyclopedia of Mental Health*
