Technology and the Environment: Implementing Smart and Sustainable Solutions into Our Cities Brahim El Bhiri, Saliha Assoul, Mohamed Essaaidi, 2025-03-06 This book presents a collection of research papers and case studies from leading experts in the field. This proceedings book explores innovative approaches to addressing environmental challenges in urban settings through the integration of technology and sustainability. From mapping urban flood hazards to leveraging artificial intelligence in e-learning and financial fraud detection, each paper offers practical insights and solutions for implementing smart and sustainable practices in cities. Case studies examine the impact of new urban spaces on human behavior, the role of digital communication in local governance, and the potential of renewable energy transition in reshaping Morocco's energetic future. Readers will gain valuable insights into topics such as smart tourism strategies, modeling solar wood drying, evaluating geothermal potential, and optimizing energy systems through machine learning algorithms and renewable energy integration. With contributions covering a wide range of topics, *Technology and the Environment* serves as a valuable resource for researchers, practitioners, policymakers, and students interested in harnessing technology to create more sustainable urban environments.

In Quest of the Craft Douglas S. Meade, 2015 INFORUM is a research project started more than forty-five years ago by Clopper Almon. The focus is on the development of dynamic interindustry macroeconomic models to forecast the economy in the long run. Over the last 30 years, the Inforum approach to model building has been shared by economists in many different countries. Researchers have focused much of their efforts to developing a linked system of international interindustry models with a consistent methodology. A world-wide network of research associates use similar methods and a common software obtaining comparable results to produce studies of common interest to the group. Inforum partners have shared their research in an annual conference since 1993. The XXII Inforum World Conference was held in Alexandria, Virginia, in September 2014, and this book contains a selection of papers presented during the sessions. All these contributions share an empirical and pragmatic orientation that is very useful for policymakers, business, and applied economists. Some papers are devoted to specific topics: productivity, energy, international trade, demographic changes, and some others are oriented to model building and simulations.
