Security Council, 2004 Human Development Report 2007/2008 United Nations Development Programme, 2007-11-15 Human development is about putting people at the center of development It is about people realizing their potential increasing choice and enjoying the freedom to lead the lives they value Created in 1990 the Human Development Report has explored themes including gender equity democracy human rights globalization cultural liberty and water scarcity The past years have witnessed the emergence of a growing consensus on climate change Governments across the world have seen the warning signs The science linking global warming to human activity is unequivocal The economic case for action is compelling the costs of inaction will heavily outweigh the costs of action Yet the politics lags behind the science and the economics Collectively the world's governments are failing to act with the urgency demanded by the scale of the threat The window of opportunity for avoiding dangerous climate change is closing fast This year's Human Development Report explains why we have less than a decade to change course and start living within our global carbon budget It explains how climate change will create long run low human development traps pushing vulnerable people into a downward spiral of deprivation Because climate change is a global problem with global causes and effects it demands a global response with countries acting on the basis of their historic responsibility and capabilities *Index to International Statistics*, 2007 **Political Settlements in Divided Societies** Christalla Yakinthou, 2009-07-23 The problem of how political settlements are to be adopted in divided or post conflict societies is one which is receiving growing attention as the international community increasingly views protracted intra state conflicts as carrying trans national consequences It is not only finding the most appropriate kind of political settlement that is so problematic but also how to reach the point where those proposals are adopted Cyprus provides an illuminating case study of these problems The object of many years of scrutiny and multiple sustained efforts at resolution of its division means that Cyprus can reveal a good deal about what impedes and what assists progress towards a settlement The experiences of Cyprus therefore can offer lessons to both

practitioners working on political solutions for divided and post conflict societies and to academics and others seeking to understand how conflicts become intractable where the primary impediments lie to successful constitutional architecture and how those impediments can be overcome. The book offers answers for why political leaders in Cyprus have been so unwilling to adopt a power sharing solution. In so doing it offers new material for the wider debate regarding constitutional design and adoption of peace plans in divided societies on the politics of institutionalising peace.

The Foreign Policy Discourse in the United Kingdom and the United States in the New World Order Lori Maguire, 2009. The goal of this book is to examine some of the major foreign policy debates in the United Kingdom and the United States in the period from 1992 to 2008 from the end of the Cold War and the aftermath of the first Gulf War to the 2008 American presidential election. The first President Bush spoke in 1991 of a new world order which seemed to mean an American hegemony. The United States was now the world's only superpower although a superpower afflicted with weaknesses especially economic ones. But by 2008 the new world order did not seem so new or so strongly American. The period saw the terrorist attacks against the U.S. of 11 September 2001, military problems for the superpower in Afghanistan and Iraq and by the summer of 2008 near economic collapse. In all of these developments Britain shared to a lesser or a greater extent. It is hoped that this book will shed an important light both on each nation and on the so-called special relationship between the two. Furthermore, this book is also not specifically concerned with policy or how policy is made but with the debate around policy and the rhetoric used to present different points of view.

The Special Relationship between the US and Britain remains an enigmatic ever-changing but still very powerful factor in world politics. As an examination of their foreign policy discourses reveals from the perspective of culture and values, few Western countries are as different as the United Kingdom and the US. With very few exceptions, the foreign policies of Gladstone and Tony Blair and Churchillian rhetoric unmatched by his supremely realpolitik politics. British governments abhor talking about values and ideals. The British cultural peculiarity is to dismiss ideology and values as packaging only to be caught by surprise time and again that they cannot do business with Herr Hitler or that people kill each other for their values, religions, constructed identities and ideologies. Most American governments by contrast have had ideological and moral crusades embroidered on their banners in their foreign policy. There is a convergence with Britain when both proclaim that all they are doing is in their self-interest but the Americans unashamedly assume that what is good for America is good for the world while the British discourse with the UK since 1945 rarely goes that far. As an analysis of their discourses reveals, the Special Relationship is thus clearly founded on something either deeper or more superficial than shared culture or values; this volume sheds light on this surprising fact in most illuminating ways and Lori Maguire's achievement in bringing together these examinations is praiseworthy indeed. Prof Beatrice Heuser, University of Reading.
