**Working with Trauma** Marilyn Charles, 2011-11-03 Working with Trauma Lessons from Bion and Lacan by Marilyn Charles takes concepts from the psychoanalytic literature and translates them into user friendly language In this book Charles focuses on clinical work with more severely disturbed patients for whom trauma has impeded their psychosocial development Introducing ideas from Bion and Lacan such as empty speech and attacks on linking she shows the reader their clinical utility Her use of clinical moments rather than more lengthy vignettes invites readers to recognize that type of dilemma and imagine how they might use the concept in their own work *The Uses of Psychoanalysis in Working with Children's Emotional Lives* Michael O'Loughlin, 2013-03-14 This volume offers very specific illustrations of psychoanalytic ways of thinking and working in both clinical and pedagogical contexts with children It is designed for professionals who work with infants children and adolescents and who are seeking modes of working that respects emotions that embrace context and that privilege imagination and possibility For professionals who already practice in ways that are sympathetic to these modes of working the scholarly underpinning of this work offers a rationale for taking a stand in favor of emotionally focused child centered work and in opposition to systems that negate the lives of children This book is for caring professionals who devote their lives to creating spaces for children to find their own paths and is intended to serve as a source of sustenance and support for such work

**Psychodynamic Perspectives on Working with Children, Families, and Schools** Michael O'Loughlin, 2012-12-08 With the push toward accountability and test performance in schools there has been a decline in emphasis on creativity imagination and feelings in schools Psychodynamic Perspectives on Working with Children Families and Schools is designed for students and professionals who are interested in restoring such values to their work with children There is an absence of psychoanalytic ways of thinking in conventional professional discourses of schooling With a few notable exceptions the discourses of child development classroom management early childhood education special education school psychology and school counseling have constructed notions of children and schooling that are often behaviorist instrumental and symptom focused Curriculum too often focuses on acquisition of knowledge and behaviors discipline is conceptualized as compliance and symptoms such as anger school resistance etc are pathologized and reacted to out of context children s special needs are often conceptualized instrumentally and children with complex psychological symptoms are delimited depersonalized or simply removed Professionals who work with children psychodynamically draw on diverse frameworks including the work of Anna Freud the long tradition of the Tavistock Clinic in London e g Anne Alvarez Susan Reid Margaret Rustin Frances Tustin etc the writings of Klein Winnicott and their colleagues French analysts e g Piera Aulagnier Didier Anzieu Laurent Danon Boileau Fran oise Dolto Maud Mannoni and Catherine Mathelin and Italian infant child analyst Alessandro Piontelli This work is valuable but often inaccessible to school professionals because the writing is somewhat specialized and because there is no tradition of teaching such work in

professional preparation in those fields This collection is theoretically grounded in that the authors share a commitment to valuing children's emotions and understand the usefulness of psychoanalytic approaches for enhancing children's lives It is laden with examples to invite into this discussion those students and professionals who value these ideas but for whom this book may be their first introduction to progressive educational ideals and psychodynamic ways of working with children

*Psychodynamic Perspectives on Working with Children Families and Schools* provides an introductory volume to open the door to the possibility of introducing psychodynamic frameworks to education and human service professors and school professionals and professionals working with children

*Adaptation and Psychotherapy* John R. White, 2023-01-30 *Adaption and Psychotherapy* gives a concentrated but complete picture of Robert Langs's adaptive clinical theory and also expands Langs's treatment of adaptation by examining Carl Jung's theory of adaptation This book articulates Jung's positive and clinical understanding of adaptation in a way that allows comparison to Langs's adaptive paradigm as well as a creative synthesis of the two approaches The result is a development of Langs's adaptive paradigm and an expansion of clinical theory and technique that is valuable for both Freudian and Jungian analysts

*Reinterpreting the Borderline* Paul Cammell, 2016-08-30 *Reinterpreting the Borderline* is a timely and comprehensive analysis of Heidegger's philosophy and its relevance to the clinical fields of psychiatry psychotherapy and psychoanalysis Cammell presents the key elements of Heidegger's philosophy and further explores affiliations with other key philosophers influenced by Heidegger By applying these philosophical ideas to developmental models and clinical treatments of borderline personality disorder Cammell develops a system of ideas he terms hermeneutic ontology exploring the fundamentally relational embodied affective temporal and technical aspects of existence that become problematized in the experience of the borderline both for the suffering individual and the concerned clinician Cammell posits that borderline experience extends beyond the suffering individual to the context of the psychotherapy itself something in which the therapist and suffering individual must collaborate to overcome *Reinterpreting the Borderline* provides a rich and complex study toward simultaneously overcoming the divide between theory and practice philosophy and psychotherapy and finally the borderline between suffering individuals and their concerned clinicians

*Breaking through Schizophrenia* Wilfried Ver Eecke, 2019-05-10 *Breaking through Schizophrenia* builds on the ideas of Jacques Lacan who argued that schizophrenia is a deficient relationship to language in particular the difficulty to master the metaphoric dimension of language which children acquire by the Oedipal restructuring of the psyche This book is thus a countercultural move to present a less damaging view and a more efficient treatment method for schizophrenic persons Through a collection of published and unpublished articles Ver Eecke traces the path of Lacanian thought He discusses the importance of language for the development of human beings and examines the effectiveness of talk therapy through case studies with schizophrenic persons

*Relating to God*, Dan Merkur, 2013-11-21 In *Relating to God Clinical Psychoanalysis Spirituality and Theism* Dan Merkur conceptualizes religious discourse within

psychoanalysis He proposes that God be treated as a transference figure whose analysis leads to a reduction of the parental content that is projected onto God Merkur notes that religious conversion experiences regularly involve theological intuitions that are either rational or owing to morbid complications have undergone displacement into irrational symbolism Analysis renders the religiosity more wholesome Traditionally psychoanalytic thought has been dismissive of religion Freud is on record however as having called psychoanalysis a neutral procedure He argued that religion with its dependency on a providential God who punishes disobedience imagines spirituality on the model of human parents and fails to approach spirituality in an appropriately scientific manner He wrote little of spiritual phenomena but mentioned both the rationality of the universe and the parapsychological occurrence of thought transference Occasionally later psychoanalysts used different language in order to contrast wholesome and morbid forms of religion Erich Fromm distinguished authoritarian and humanistic religions while D W Winnicott condemned fetishistic behavior while approving of playful illusions that require belief in These formulations constructed a middle position for clinicians neither categorically opposed to religion as classical psychoanalysis was nor do they embrace cultural relativity as spiritually oriented psychotherapists are currently advocating What sorts of spiritual practices does psychoanalysis find unobjectionable As examples of humanistic religion Fromm named Zen Buddhism Buddhist mindfulness meditation and the via negativa or way of negating that some Christian and Jewish mystics have followed Because the Bible based approaches are little known Merkur discusses their histories procedures and psychoanalytic understanding **At the threshold of the millennium** María Rosa Fort Brescia, Moisés Lemlij, 1999

**The New Klein-Lacan Dialogues** Julia Borossa, Catalina Bronstein, Claire Pajaczkowska, 2018-05-01 This book provides a timely exploration and comparison of key concepts in the theories of Melanie Klein and Jacques Lacan two thinkers and clinicians whose influence over the development of psychoanalysis in the wake of Freud has been profound and far reaching Whilst the centrality of the unconscious is a strong conviction shared by both Klein and Lacan there are also many differences between the two schools of thought and the clinical work that is produced in each The purpose of this collection is to take seriously these similarities and differences Deeply relevant to both theoretical reflection and clinical work the New Klein Lacan Dialogues should make interesting reading for psychoanalysts psychotherapists mental health professionals scholars and all those who wish to know more about these two leading figures in the field of psychoanalysis The collection centres around key concepts such as symbolic function the ego the object the body trauma autism affect and history and archives *Bion and Primitive Mental States* Judy K. Eekhoff, 2021-12-31 This clinically focused book explores W R Bion's thinking on primitive and unrepresented mental states and shows how therapists can work effectively with traumatized patients who are difficult to reach The author illuminates how trauma survivors suffer from direct access to primal undifferentiated positions of the psyche that lie outside the symbolic order of the mind and are resistant to treatment This access unmediated by symbolic representation but represented in the body disrupts the normal trajectory of development

and of relationship Integrating theory and clinical application the book addresses processes of symbolization somatic receptivity and the use of countertransference when working therapeutically with undeveloped areas of the mind It also demonstrates how primitive body relations and object relations include the body of the analyst as part of the analytic frame and are essential in establishing a therapeutic alliance Illustrated with detailed clinical vignettes Bion and Primitive Mental States is important reading for psychoanalysts psychologists social workers and educators who wish to understand primitive states of mind and body in patients who have previously been considered untreatable
