bibliography had its inception in 1967 when the compilers first attempted a comprehensive cov erage of the finite element
literature using both manual and computer based retrieval Initially the data base was stored on a card index but this was
subsequently transferred to punched cards and magnetic tape Computer processing was adopted at an early stage to derive
the three index formats from the data base Over the subsequent years several versions of the bibliography were produced
with two of these being made available in a report form to other researchers From the widespread interest in these
documents it became evident that there was a need for a commercially available comprehensive bibliography in this area A
major effort was undertaken to revise update and extend the data base resulting in this present volume The bibliography
covers the period 1956 1975 primarily although some earlier publications of histori cal interest are included The citations are
not restricted to the English language and documents are listed in many languages and from diverse places of origin All
publication formats were accepted so that references will be found to books monographs journal papers and articles theses
