Tos Hostivar Manual:

New Technologies and Work Arthur Francis, Peter Grootings, 2018-03-26 Originally published in 1989 this book is a valuable contribution to the development of a non technological approach in the study of technology and work The studies compare the introduction and implementation of new technology at work in similar enterprises throughout Europe The contributors share the basic assumption that the impact of technology varies greatly according to the characteristics of the country and its socioeconomic system They view changes in work as the result of the complex combinations and interactions of such conditions and technology rather than of technology per se and their focus is therefore on the mechanisms and processes which come into play when new technology is being introduced The book's international scope makes it a rich empirical source of comparative material *Acta*, 1987 *Czechoslovak Heavy Industry*, 1976 **Czechoslovak Foreign Trade**, 1990 **Publications of the Astronomical Institute of the Czechoslovak Academy of Sciences**, 1985
