Dunning, 2020-12-17 Completely revised and updated this tenth edition of a bestseller covers both management and technical strategies for slashing energy costs by as much as 40 percent in industrial facilities It discusses cogeneration gas distributed generation technologies steam system optimization geothermal heat pumps energy outsourcing electricity purchasing strategies and power quality case studies It also provides guidelines for life cycle costing electrical system optimization lighting and HVAC system efficiency improvement mechanical and process system performance building energy loss reduction financing energy projects and more

Handbook of Air Conditioning and Refrigeration Shan K. Wang, 2000-11-07 A broad range of disciplines energy conservation and air quality issues construction and design and the manufacture of temperature sensitive products and materials is covered in this comprehensive handbook Provide essential up to date HVAC data codes standards and guidelines all conveniently located in one volume A definitive reference source on the design selection and operation of A C and refrigeration systems *Handbook of Energy Engineering* Albert Thumann, D. Paul Mehta, 2001 Newly updated this comprehensive reference includes a new chapter on codes standards and legislation and also a new chapter on compressed air This book will guide you step by step in applying the principles of energy engineering and management to the design of electrical HVAC utility process and building systems for both new design and retrofit projects You will learn how to do an energy analysis of any system Detailed presentations cover electrical system optimization state of the art lighting and light control thermal storage cogeneration HVAC system optimization HVAC and building controls computer technologies and financing energy projects The text is thoroughly illustrated with tables graphs diagrams and sample problems with worked out solutions BOOK JACKET
